

GETTING STARTED

SIGNING-ON TO THE AGENT CONSOLE

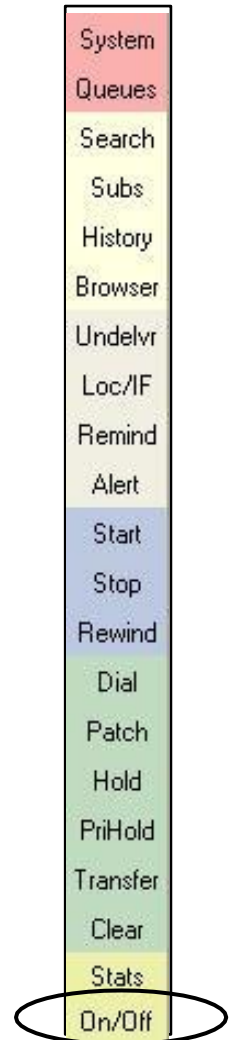

From the “*Idle*” state,

Press the [SN ON] key (on
Numeric keypad)

or

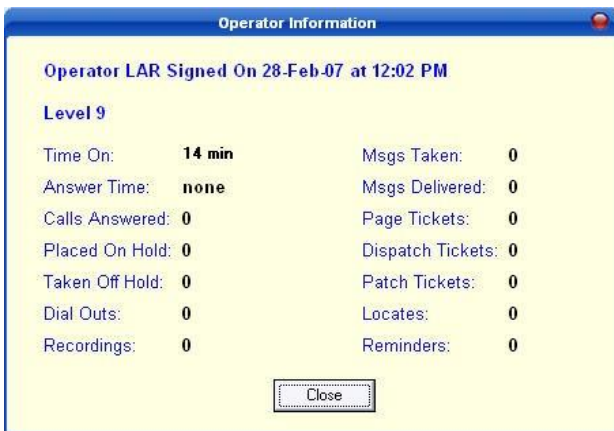

A screenshot of a software window titled "Sign-On to Spectrum Data Manager". The window has a light blue background. At the top, the "Spectrum Agent" logo is displayed in a colorful, stylized font, with "by Telescan" in a smaller font below it. Below the logo, there are two input fields: "User Name:" with the text "LAR" and "Password:" with the text "*****". At the bottom of the window, there are two buttons: "Sign-On" and "Cancel".

OPERATOR INFORMATION

Upon validation, the **Operator Information** pop-up window will be presented. This window displays the agent's call stats since sign-on.

The 'Operator Information' window displays the following data:

Operator LAR Signed On 28-Feb-07 at 12:02 PM			
Level 9			
Time On:	14 min	Msgs Taken:	0
Answer Time:	none	Msgs Delivered:	0
Calls Answered:	0	Page Tickets:	0
Placed On Hold:	0	Dispatch Tickets:	0
Taken Off Hold:	0	Patch Tickets:	0
Dial Outs:	0	Locates:	0
Recordings:	0	Reminders:	0

A 'Close' button is located at the bottom center of the window.

An Agent may view his/her statistics at any time during the current sign-on session by pressing the “Microsoft Application” key located next to the right-hand side [CTRL] key on the keyboard.

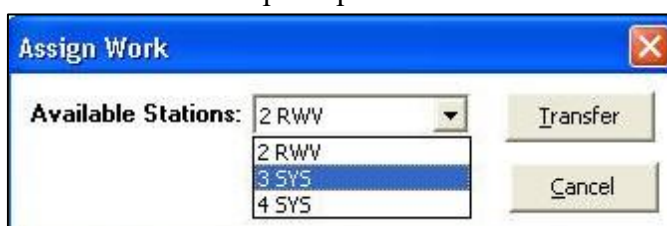

- ❖ Press [Apps] + O (the letter O).
- ❖ If using the mouse, **left-click on the [Stats] Agent Shortcut Button** in the lower- right corner of the screen.
- ❖ After viewing statistics, click the [Close] button in the window or press the [SELECT] key on the keyboard.

SIGNING OFF and Assigning Work FROM THE CONSOLE

- ❖ Press the [SN OFF] key, or if using the mouse, click the [On/Off] agent shortcut button. A validation prompt will appear:

Sign-Off? Press “Y” to Validate

- ④ Type ‘Y’ to complete the ‘Sign-off’ sequence. The console will display an *Idle* state.
- ❖ If **pending work** exists, **assign the work to the dispatcher**. select the dispatcher’s station # in the drop-list presented.

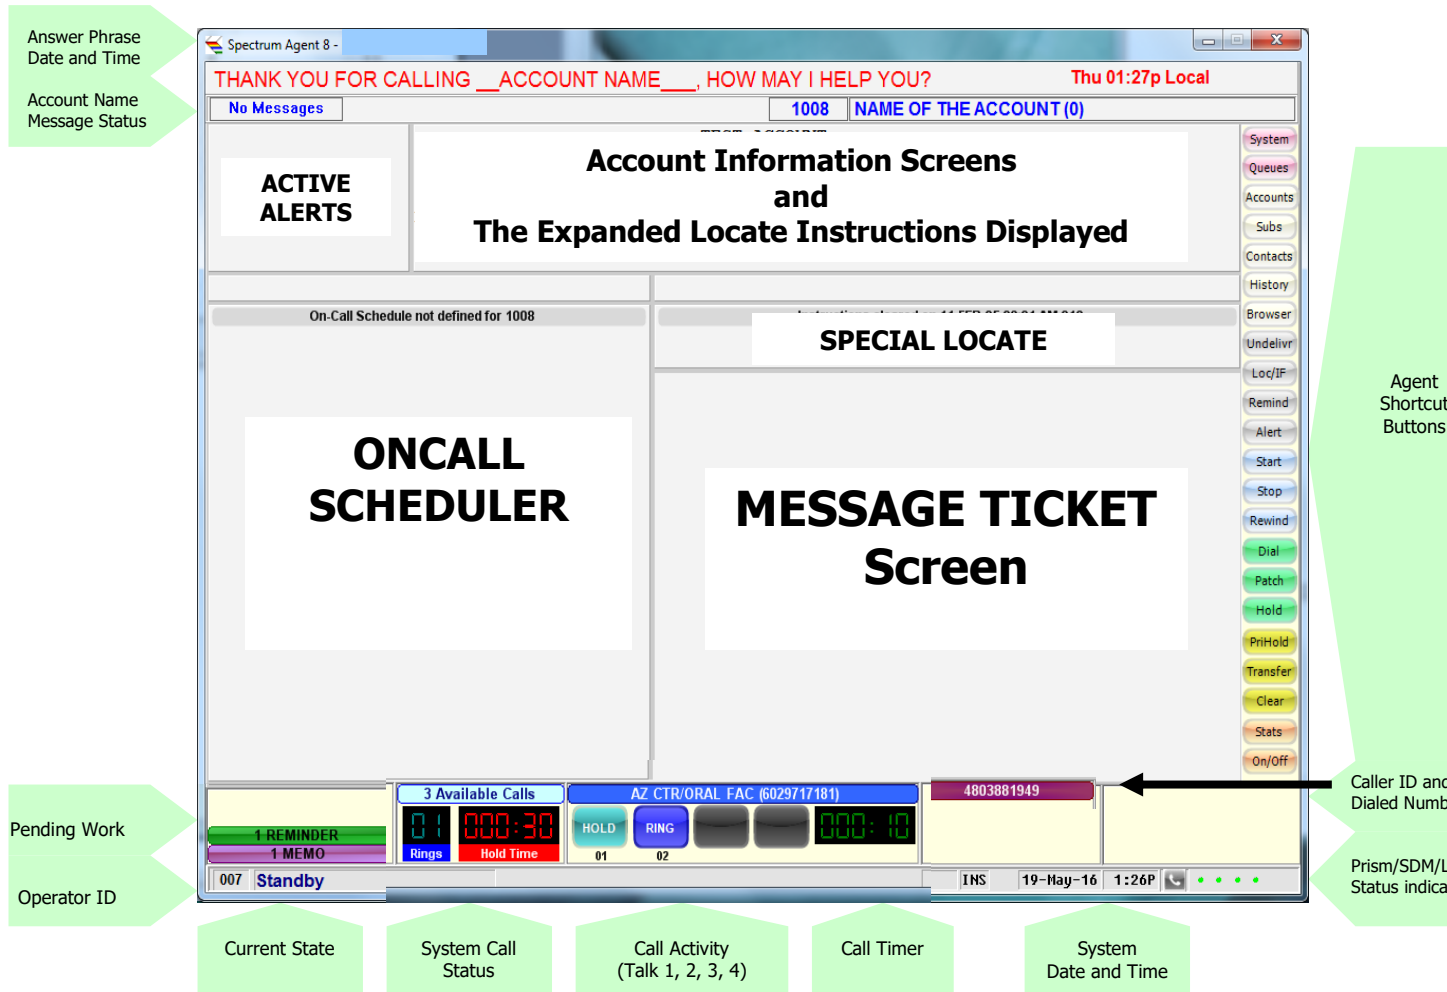

The 'Assign Work' window shows a list of available stations:

Available Stations:
2 RWV
2 RWV
3 SYS
4 SYS

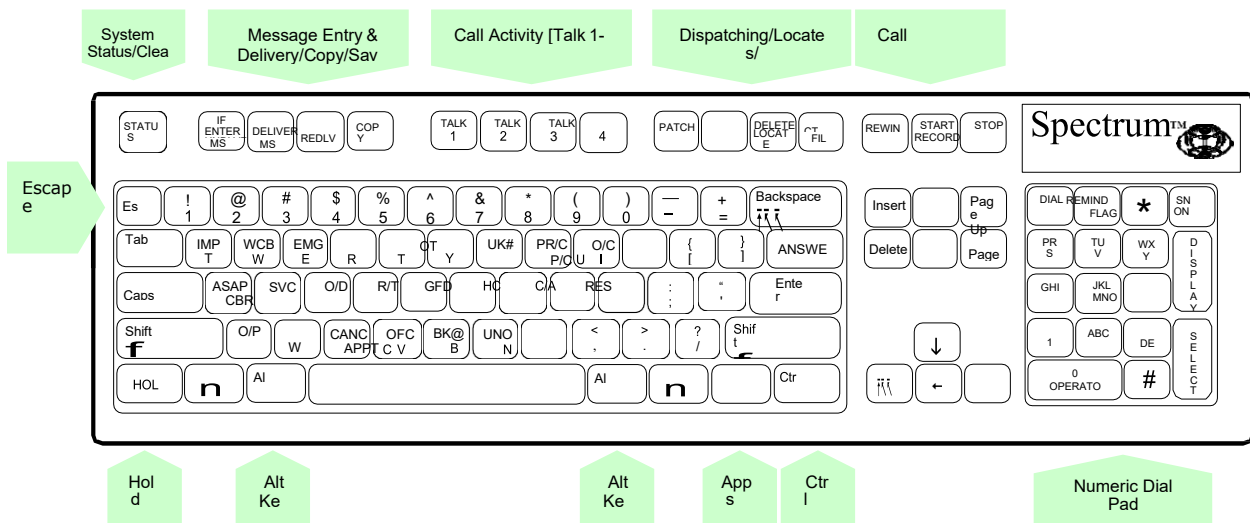

Buttons for 'Transfer' and 'Cancel' are located to the right of the list.

Then select ‘Transfer.’ All *pending pages, transmit memos, reminders* will be transferred to the selected agent/console.

The Agent Spectrum Screen

The Spectrum Agent Keyboard

Function and Dual-Function Keys: Many of the function keys have dual functions. The function on the lower half of the keys can be initiated by pressing the key. Functions listed on the top-half of the keys can be initiated by pressing [SHIFT] and the key. ***Agent Shortcut Buttons*** are the colored buttons displayed on the right-hand side of the Agent console, they work similarly to the functional keystrokes and keystroke combinations as mentioned below.

STATUS/CLEAR	Disconnects the agent from the line
If/Enter Msg	[ENTER MSG] to generate a message ticket. [Shift]+ [IF/ENTER MSG] to create an UF (temporary, internal) message for an account.
IF/DELIVER MSG	[DELIVER MSG] to display the Undelivered Message List. [DELIVER MSG] will also display the list of purple flashing Transmit Error Memos (from a blank screen and in “Standby” state). [CTRL] + [DELIVER MSG] to search the system for undelivered messages. [SHIFT]+[UNDLVR/RDLVR] to return a msg that has already been delivered back to the Undelivered Message List.
UNDLVR/REDLVR	[REDLVR] to display the Delivered Msg List, a list of messages that have previously been delivered in some way. [SHIFT]+[UNDLVR/RDLVR] to return a message that has already been delivered back to the Undelivered Message List.
COPY/SAVE	[SAVE] to edit an undelivered message or to force a msg on to the Incomplete Message stack. [ALT]+[COPY] to make a copy of a message for a designated account AND make any necessary editing corrections, and press [FILE] to initiate.
TALK 1-4	[TALK] keys correspond to 1 of 4 activity windows on-screen and will be used to answer incoming calls, to dial-out and to patch
PATCH	[PATCH] indicates a conference call connecting an incoming call with an out-going call.
DELETE/LOCATE EDIT	[LOCATE EDIT] to enter or update the Locate Instructions. [DISPLAY]+ [LOCATE EDIT] (or use the [*] key in the Numeric keypad) to view Expanded Locate Instructions (ELI) information while answering an incoming call or when dialing out.
Ct. REM/FILE	[FILE] to signify the completion of data entry in a message ticket. [FILE] is also used to signify the completion of any other work, like entering Locate Instructions, “IF” messages and memos.
INSERTING/OVERWRITING TEXT	By default, text is entered in the “OVR” (OVERWRITE) MODE in Spectrum. This means when the cursor is placed at the beginning of an existing word or sentence, the new text that is typed will overwrite the existing text.

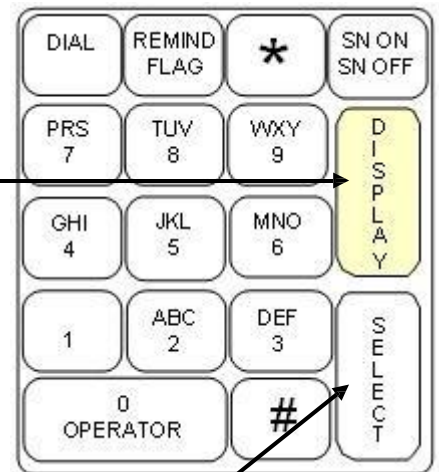

Displaying accounts and Locate instructions

DISPLAYING AN ACCOUNT OR SUB-ACCOUNT

Display a **Master Account**, From the **Standby** state,

- Press the **[DISPLAY]** key (on Numeric keypad).
- Enter a **4-Digit** account number to display a master account.

*Note: Pressing the **down arrow** will move to next sequential master or sub-account, the **right arrow** will move to the next sequential master, bypassing any sub-accounts.

Display a Sub-Account while viewing a Master Account

- ◆ Press **[DISPLAY]** key
- ◆ Enter the **1 or 2-digit sub-account number**, press **[SELECT]** to move to the sub-account.

If you are in a **sub-account** and you wish to go directly back to the **Main screen**:

Press **[Display] + [Select]** - to get to main screen when in Sub-Account

Press **[Display] + [Home]** - to get to main Master Account Screen

Sub-Accounts might be used for:

to sort out different medical offices or specialists under the same medical group name.

internal dispatching - auto-copied messages - offices request a 2nd copy of the message to be sent to a different number, fax, email.

To search for an account

Press **[ALT]+S** or "LEFT" click on ACCOUNTS in menu.

Then type in the search bar the account name or a key word.

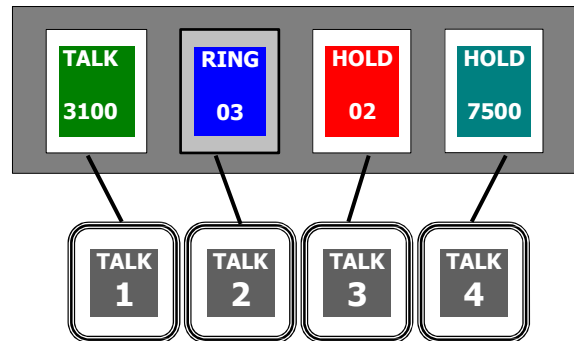

INCOMING CALLS

ANSWERING A CALL

Press [TALK 1-4] -this selects the call and brings up the account screen. The caller is not live.

Press [ANSWER] -This brings the caller live on the line.

Pressing [CLEAR] disconnects the call once the call is completed.

PLACING A CALL ON UNIVERSAL HOLD

As an Agent, you are expected to place incoming calls on HOLD by using:

- UNIVERSAL HOLD: Placing a call on UNIVERSAL HOLD will make that call available to be picked up by all agents. The TALK key will then change to a **RED HOLD**.
- To place the current caller on hold to answer another incoming call press the HOLD key. This will place the current caller on hold.
- To place a call on HOLD you will have to modify the account's answer phrase:

"Benjamin Franklin, this is ____ May I Place You on Hold?"

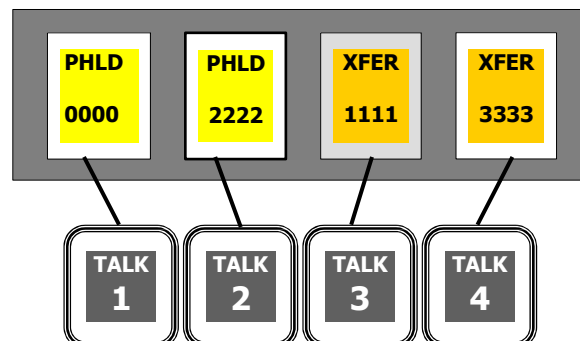

If the caller says YES, say "Thank you" and put them on UNIVERSAL HOLD. If the caller says NO, don't put them on HOLD, take the call. *If it's an account you are not trained to manage, then let the caller know you will TRANSFER caller to someone who can assist them.

- If you are not on a call and there is a spurt of calls ringing in, ANSWER all the ringing calls to put them on HOLD using the MODIFIED HOLD ANSWER PHRASE. Keep putting the calls on HOLD until the spurt stops.

PLACING A CALL ON PRIORITY HOLD

Placing a call on **PRIORITY HOLD** will make that call available only to the agent that initiated the Hold. (A Console can have up to four Priority Holds or Transferred Calls at once.) **DO NOT** place the current caller on PRIORITY HOLD no more than two times during the same call.

To place the current caller on hold exclusive to your console (call will not be available to

other agents), you may: Press
[Shift]+[HOLD] or press ALT
+ **HOLD.CALL PHRASES**

The following phrases are mandatory. AT ALL TIMES, every employee at Answer Arizona is to be professional, polite, and courteous to every caller. "Please" and "Thank You" must be said with every question and statement. DO NOT SAY "UH HUH," "WHAT," "UMM." We are a "MESSAGE CENTER" NOT Answering service.

Opening phrase

"May I ask who is calling, please?"

When putting calls on hold

"Can you hold, please."

Returning to a call on hold

"Thank you for waiting. May I help you?"

Ending phrase

"I will ask _____ to call _____ regarding _____ at (phone number). Is that correct? Thank you."

Patch Release

"One moment please while I connect you to _(clients name)_." If the caller says thank you be sure to end the call by saying "you're welcome"

Announce Patch

* In most cases "One moment please while I connect you to _(client's name)_." And announce the caller and any other information required to the client.

Verifying the spelling of names – **SPELLING SHOULD BE VERIFIED ON ALL CALLS!!!**

"Will you spell your name, please?"

Requesting a telephone number

"Your telephone number, please?" or "May I have your telephone number, please?"

Caller refusing to leave a telephone number.

"May I have your telephone number for my records, please?"

"Mr./Ms. _____ may not have your number with him/her."

"Your telephone number is paged directly to Mr./Ms. _____." (Make sure client has a pager.

Requesting a message – Always repeat the phone number.

"May I ask what this call is regarding, please?," "What is the nature of your call, please?"

Giving out information on the client's return or when the message will be received.

“I will page Mr./Ms __shortly and ask him/her to return your call.” (Make sure client has a pager)
“Mr./Ms _____ will be checking in shortly.”

TRANSFERRING A CALL

To transfer a caller to another agent console:

Press [ALT] + T or If using the mouse, select the ‘*Transfer*’ agent shortcut button.

Then type the desired station number.

If it's a single digit station number, then add a “0” plus the 1-digit number of the station.

Ex: Console 2 would be entered as “02”.

Console 22 would be entered as “22”.

To Access a Transferred Call:

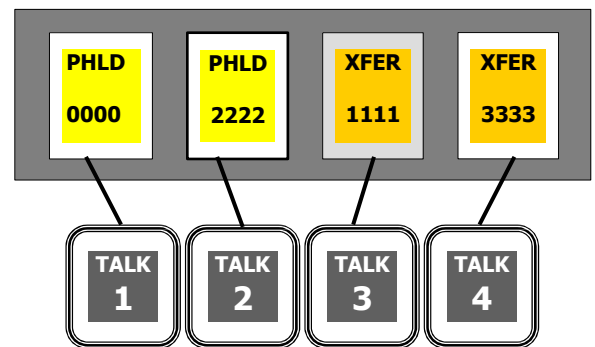

Press the [TALK 1-4] key **ONCE** to the corresponding “*XFER*”(Transfer) Activity Window

or, if using the mouse, click on the “*XFER*” activity window

This selects the call and opens the account screens. *The caller is not live at this time.*

Next Press the [ANSWER] key

Or press the [TALK 1-4] key **A SECOND TIME** to bring the caller on live.

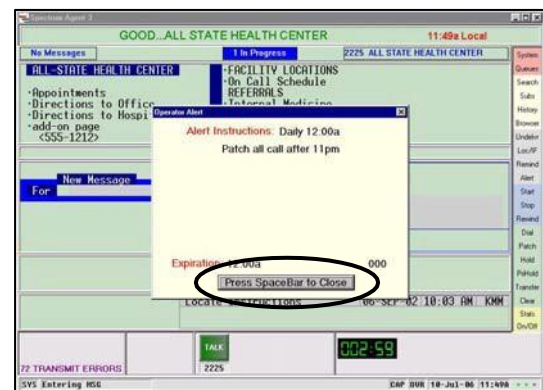

ACCOUNT ALERTS

An **Account Alert** may pop up at the Agent console when an inbound call is presented to the console, if configured. The Alert must be dismissed by the operator (by pressing the spacebar) before any further action can be taken. Alerts are designed to notify agents of special conditions related to the handling of calls for the programmed account.

To Act on an Account Alert:

- ◆ Press [Spacebar] to close the Alert window to proceed to call processing.

ACTIVE ALERTS

Active alerts are located in the upper left-hand corner of the Spectrum screen. This area may have important information to act upon while on the phone with the caller. Always make sure to take a glance at the active alert window when on the phone with a caller.

It is good to go through the accounts and familiarize yourself with any active alerts there may be.

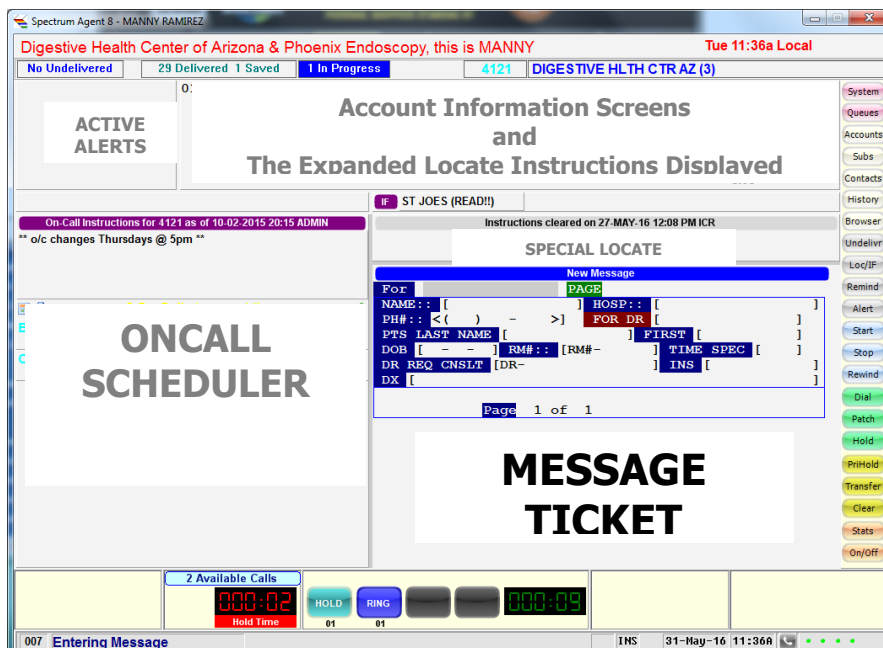

Spectrum On-Call Scheduler:

The Spectrum on-call scheduler is located to the left of the message ticket screen. The Spectrum On-Call Scheduler is an automated system that tracks our client's schedules so that messages can be relayed accurately, day and night.

As an agent you will not be required to edit the on-call scheduler. You will have to refer to the information from time to time. It's always good to take a look to see if there are any patching instructions.

It can also be used for on-call instructions or to show a list of doctors who are off such as in account 8601 and many other accounts.

The Russ Lyon Accounts are set up so that you can patch to the on-call personnel, if need be, by double clicking on the agent's name in the on-call scheduler. **This will be covered further in under the patching section.*

The Message ticket screen is where you will record the caller's information and file it so that the dispatcher can review it and relay the message.

Messages can be transmitted via:

Text message, E-mail, Fax

Alpha pager

Secure messaging

Dial-out

As an agent you don't really pass the message unless the message ticket is set up to be auto transmitted. The dispatcher relays the message.

WHEN CALLERS REQUEST A SPANISH SPEAKER;

- Step 1 Press Display Key, enter account 0000.
- Step 2 Select Current Date to view dispatcher/operators on duty.
- Step 3 Search for “S” next to the dispatcher or operator’s name. “S” indicates that dispatcher or operator is a Spanish speaker.
- Step 4 Take Spanish caller off hold, TRANSFER Spanish caller to the dispatcher/operator’s station number.

If There are No Spanish Speakers on Duty:

- Step 1 Place the SPANISH CALLER on PRIORITY HOLD
- Step 2 Go to account 4444 and Select SPANISH SPEAKER
- Step 3 Search for SPANISH SPEAKER ON CALL in the SPECIAL LOCATE
- Step 4 Double click on the SPANISH SPEAKER ON CALL’s <phone number>
- Step 5 Announce you have a Spanish speaker on Account XXXX.
- Step 6 If NO ANSWER, try the B/U ON CALL.
- Step 6 If B/U NO ANSWER, connect caller to the SPANISH TRANSLATOR.

HEARING/ SPEAKING IMPAIRED CALLERS

Hearing impaired or deaf callers may utilize a RELAY SERVICE to assist them. A CA (Communications Assistant) will assist the caller. The CA will alert the operator. (These types of calls may take longer than usual.)

How to assist the caller:

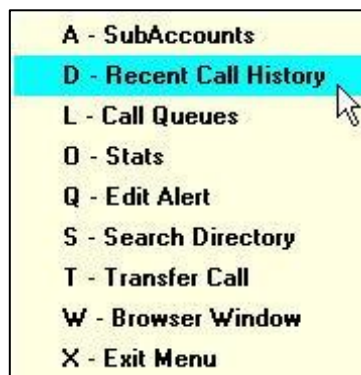

- You may have to SPEAK MORE SLOWLY. The CA may be using AMERICAN SIGN LANGUAGE or may be typing in your responses or use other forms of RELAY.
- Speak directly to the other person. The CA is on the line to relay the call but NOT involved in the conversation. Speak as if the CA is not there and address the other party.
- To let the caller, know that it is her/his turn to speak, say “GO AHEAD.”
- When call is complete, end the call with your customary “Thank you.”

DISPLAYING THE LIST OF CALLS MANAGED: CALL HISTORY

The system has the ability to save the **last 500 calls** managed by a particular agent during a session. A call list can be accessed displaying the accounts and the time the calls were answered.

From the “*Standby*” state:

- ❖ Press the [ALT]+D or If using the mouse, select the ‘*History*’ agent shortcut button. to display the **Recent Call History**.
- ❖ Press an arrow key to move to desired account, then press [SELECT] or click on desired account using the mouse.
- ❖ Just like most of the lists in the Spectrum Agent, the oldest call appears first; the newest call appears last in the list.

COLOR CODES OF CALL MANAGED:

Note each entry lists the time, account number and name and may be color- coded.

- **Blue entries** represent answered calls.
- **Amber entries** represent accounts that were displayed once the call was answered.
- **Red entries** indicate calls that were accessed from the holding queue.
- **Magenta entries** indicate a dial-out.
- **Grey entries** indicate an account that was [DISPLAY]’ed from the Agent Console.

SELECTING A CALL IN THE CALL HISTORY AND HOW TO LISTEN TO A CALL IN THE VOICE LOGGER

Agents can listen to previous calls in CALL HISTORY. Dispatchers may ask you to verify the caller's information such as phone numbers, spelling of names, if call is an emergency or non-emergency, etc.

- Select HISTORY from the Spectrum Short Cut Bar.
- Scroll down to locate the account name or the account number and the time you took the call.
- Using your mouse, RIGHT CLICK over the call.
- This will bring up the VOICE LOGGER on the BOTTOM right side of the SPECTRUM SCREEN

[insert screen shot of voice logger box]

- The VOICE LOGGER can also be accessed by "bypassing" the "FOR:" in the IF DEL messages by going to the ticket and right clicking on the message you need directly from the list of messages.

HOW TO EDIT A TICKET USING THE VOICE LOGGER:

- Access the ticket in IF DEL or UNDEL/REDELIV to edit the information if needed.
- Using your mouse, click on the "right arrow" on the VOICE LOGGER to activate recording.
- If corrections are needed, edit the ticket and FILE the MODIFIED ticket.
- Make sure you send a MEMO to the dispatcher confirming the edit was corrected or if the existing information is correct.

ACCOUNT INFORMATION SCREENS

As an agent looking at the information screens you are looking for instruction on:

- ❖ Do I take a Message or How do I refer to the Caller?
- ❖ Which ticket do I use (if multiple tickets)?
- ❖ What information do I need to collect?
- ❖ Do I have to Patch or Announce Patch this call prior to disconnecting with the caller?
- ❖ Is there anything else I may have to address with the caller on the line?

What is the difference between an Emergency and What is a Routine Matter?

An EMERGENCY is something that cannot wait until the office returns to their normal business hours. Medical emergencies would include things like: Hospitals calling to speak to the doctor, medication reactions, emergency prescriptions (if the account accepts after-hour prescriptions) or canceling a surgery the night before. If you are uncertain about passing the caller's message as an emergency, you can ask the caller if they feel it's an emergency. If you're still in doubt, ask the DISPATCHER.

PROPERTY EMERGENCIES would include, but not limited to, broken plumbing, no electricity, or no air conditioning, etc.

Other types of emergencies: There are many different types of industries we answer for. However, a caller's situation might be considered an emergency in one account and may not be considered an emergency in another account. Become familiar with types of emergencies that are particular to the account.

An example would be a janitorial service company may consider a same day appointment cancellation an emergency and may want you to patch the caller over to the Client's number.

Yet, other accounts may not consider a same day appointment cancellation an emergency.

ROUTINE MATTER is something that can wait until the office returns to normal business hours: Paperwork, insurance matters, billing questions, customers wanting to schedule non-emergency work or schedule an appointment.

Do I Take a Message or Where do I refer the Caller?

The following explanations are *in general*, because there are some accounts that may have exceptions to these guidelines. It is very important to look through all the accounts and familiarize yourself with those exceptions.

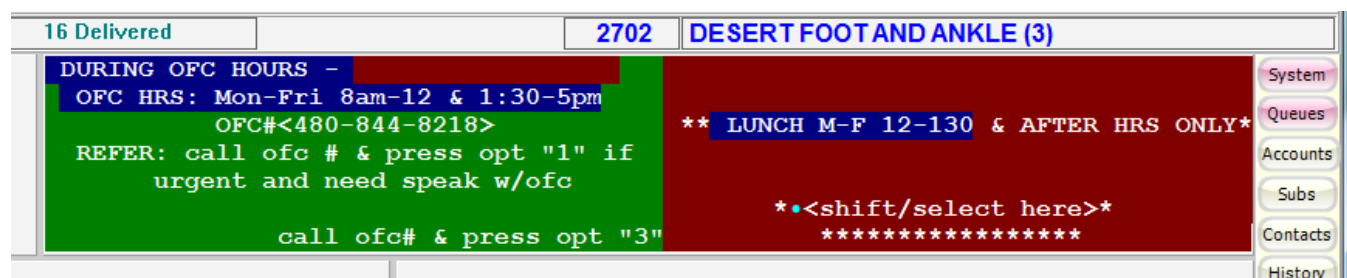

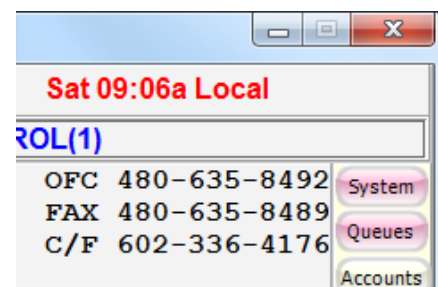

RETURN REFER OFFICE (RTN REF OFC): Only if it's an EMERGENCY. Cannot wait until the office returns to their normal business hours. Non-emergency calls OPERATOR will refer caller to call office during normal business. OPERATOR will not take a message. If the caller insists on leaving a message, you can let the caller know you are available for emergencies only.

HOW TO REFER A CALLER DURING NORMAL BUSINESS HOURS: There are several reasons why the caller may have reached the answering service during the office normal business hours. Some reasons include calls being forwarded for a meeting, computer/phone issues or lunch.

*Always check the SPECIAL LOCATE to see if there is a reason the phones are forwarded to the answering service.

Another major reason is the caller may have called the incorrect office number. Verify which number the caller dialed.

*This happens a lot when people select redial from a voicemail that they get from the office. You will just need to advise the caller of the office number or offer to patch them to the office.

Some of the accounts are set up in this manner with the green (left) and red (right) screen. Be aware that these screens vary in hours and instruction from account to account. Familiarize yourself with the differences in call instruction from account to account. Familiarize yourself with the differences in call instruction from to account to account. (These screens are designed

this way because Answer Arizona receives a lot of callers call the after-hours number instead of calling the office number.)

2 Delivered	1 In Progress	2792	DR CASSIDY ABC CHILD (3)
01	NO NEW PTS AFT HRS WHEN OFC IS CLSD		OFC <602-222-
			REF 602-336-
INSTR: NAME, #, PT NAME, DR, PROB, ER?			FAX 602-222-
TYPE: CHILDREN'S EYE SURGEON			•BKL
HOURS: M-TH 8-4:30 FRI 8-2:30 (LUNCH 12P-1P)			NO RX
ADDR: SEE PAGE 2			
RELAY: RTN REF OFC			- ERS : SEE PG 2

RELAY: The MESSAGE TICKET. The operator will put the appropriate RELAY in the “FOR” FIELD on the ticket. The RELAY information will tell the DISPATCHER if the call is to be for the ON CALL or for the office during business hours. The RELAY information is located in the bottom left corner of the ACCOUNT INFORMATION BOX in green (see above)

TYPES OF RELAYS ARE:

REFER ROUTINE OFFICE (RTN REF OFC): Messages can be taken after hours only if it’s an EMERGENCY and cannot wait until the office returns to their normal business hours. Non-emergency calls OPERATOR will refer caller to call office during normal business hours, OPERATOR will not take a message. If caller insists on leaving a message, you can let the caller know you are available for emergencies only.

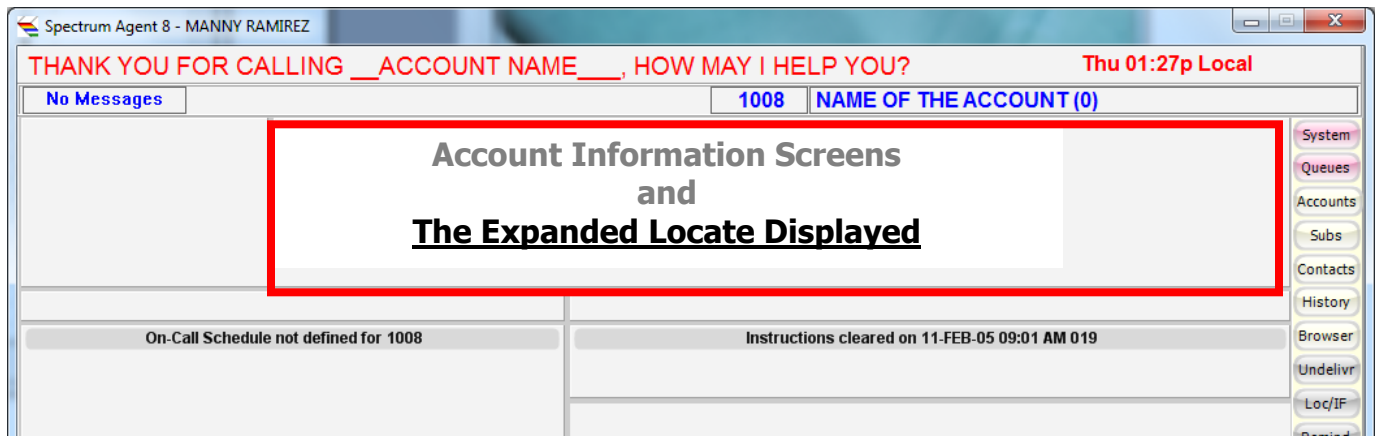

HOLD ROUTINE (HLD RTN) This means OPERATORS can take a message during normal business hours and after hours (when office is closed). **In the ‘FOR FIELD’ the OPERATOR will enter ‘HLD RTN.’** These calls are non-emergency calls.

PASS ALL/TAKE ALL Means “take all messages,” the caller should receive a call back the same night regardless of an emergency or a routine matter. Some accounts will still want to know if it is an emergency. You may have to document that in the message ticket as a *SIDE DOCUMENT. Example: *ER See “Side Documentation in Section V.” **“In the ‘FOR FIELD’ the OPERATOR will enter OFFICE for non-emergency or ON CALL for emergency.**

PATCH/PATCH ALL – You don’t have to open a message ticket. Simply PATCH the caller to the CLEINT or Extension they desire. **In the “FOR” field the OPERATOR will enter O/C *PATCHED.**

ANNOUNCE PATCH – Open a message ticket and collect the requested information from the caller, then ANNOUNCE PATCH the caller over to the correct person. File the message ticket. **In the “FOR” field the OPERATOR will enter O/C *Patched. (If the instructions say, “Patch to Dr O/C, which means ANNOUNCE PATCH.”**

EXPANDED LOCATE INFORMATION (ELI)

will have to familiarize yourself with the different accounts. Not all instructions can be set up the same, because every office has its own way of determining who is on call.

As an agent you will not be required to edit the Expanded Locate Instructions (ELI). If a client calls in requesting a change to the Expanded Locate Instructions. Then you will transfer the client over to the dispatcher.

As an agent from time to time you will need to view the Expanded Locate Instructions.

The **Expanded Locate Instructions (ELI)** shares the same screen as the **Account Information Screen**

When you display the Expanded Locate Instructions (ELI) you will have to toggle back and forth between the Expanded Locate Instructions and the Account Information Screens.

To Display the Expanded Locate Instructions

- Press **[DISPLAY]** then **[EDIT LOCATE]**, to display ELI area.
- or press the **Asterisk key [*]** on the numbers pad. Using the **[*]** key will allow you to **toggle** between the expanded locate area and the first information screen.

The SPECIAL LOCATE

The **Special Locate** area holds up to 108 characters of **short-term information** for an account.

Every Time you take a call:

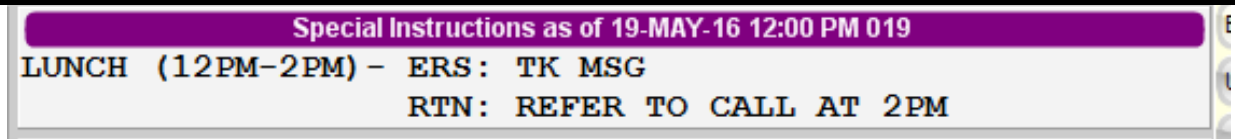

You must LOOK At The LOCATE.

Check to see if there are any special instructions you may need to address with the caller while they are on the line.

At the beginning of your shift, you should always click through ALL the LOCATES on the LOC/IF button on the right-hand side of the Spectrum window. This will keep you up to date with any immediate temporary account changes that you may have to act upon.

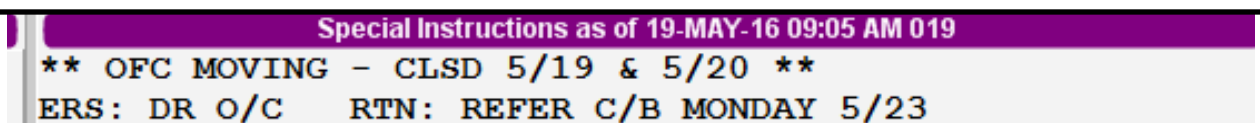

Here are some examples and explanations of Special LOCATES

This LOCATE explains that the office stepped out to lunch from 12pm to 2pm.

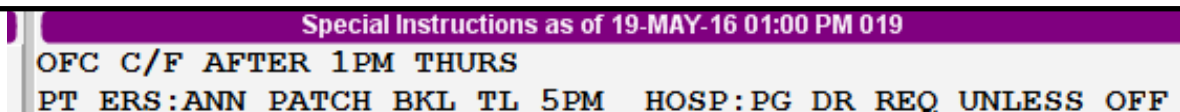

If the caller has an emergency (**ERS**) then we take a msg.

If the caller has a routine (**RTN**) matter, then we advise the caller to call back at 2pm when the office returns.

This locate explains that the office is closed for moving on 5/19 and 5/20

If a caller has an emergency (**ERS**), then we take a message. The dispatcher will notify the DR O/C. If the caller has a routine (**RTN**) matter, then we advise the caller to call back on Monday 5/23 when the office returns.

This explains calls are forwarded(**C/F**) after 1pm on Thursdays.

If the caller has an emergency, then we are to Announce Patch to the office back line (**BKL**) TL 5pm. If a hospital calls in, then we take a message, and the dispatcher notifies the Doctor.

Special Instructions as of 16-MAY-16 08:17 AM 010
ANN PATCH ALL CLS & TEXT: CHRIS O/C TL 5/20 5PM

This explains that we are to Announce Patch all calls to Chris the O/C and the dispatcher will text the message. You will need to scroll down to find Chris' phone number. This LOCATE information will expire 5/20 at 5pm.

Special Instructions as of 19-JAN-16 04:18 PM 012
ANN PATCH ER'S: PAUL INA JEFF INA MIKE
ANN PATCH RTN: PERS REQ INA PAUL INA MIKE INA JEFF

This explains what sequence we are to Announce Patch to if it is an emergency or a routine matter. FYI, INA means If No Answer.

Special Instructions as of 19-MAY-16 10:02 AM 019
ALSO CHECK SUB ACCT 02 FOR MSG'S! DNR!
XXXXXXX O/C TL 5/20 7:30AM PER XXXXX

The first line of this locate is to remind the operator to check sub account 02 for messages. This would be done when the office checks in.

On the second line the dispatcher has already set up the o/c format for you the operator. When you see this format, you must ask the client who is on call. Also get the client's name that called in.

You would replace the x's with the name of the person on call and then also the name of the person that gave you the information.

The LOCATE is set up for when the office checks in with us. It reminds us where to check for possible extra messages and to ask the client who is on call.

Please be aware of how important it is to read and understand the Special locate information with the caller on the line as you may have to Announce Patch a call or advise the caller of a temporary situation.

Not following the SPECIAL LOCATE instructions may result in delaying an emergency call out.

Be sure to get yourself into the habit of always looking at the SPECIAL LOCATE when first answering a call.

TO DELETE/LOCATE EDIT

Answer a call or display an account then,

- ❖ Press the [DELETE/LOCATE EDIT] key. Enter the new/current locate informatio
- ❖ Press the [FILE] key then the **border will now appear purple.**

A SPECIAL LOCATE FOR ON CALL CHANGES MUST LOOK LIKE THIS:

Medical: (Always verify doctor is listed with contact information on screen if a doctor is not listed then we do not have contact information – ask a dispatcher FIRST before disconnecting with the client!)

DR (name) O/C TL (date) * If DR is taking all newborns: NBS: DR (name) TL (date)

If DR taking other DR's newborns: DR (name)'s NBS TO DR (name) TL (date)

If DR from another account on call: DR (name) O/C TL (date) * DISPLAY ACCT (number)***

If we are to refer another doctor's office number: DR (name) O/C TL (date)
***REFER (office number) ***

If a triage nurse is checking in, transfer to dispatcher immediately! IF the current dispatcher is backed up and there is another dispatcher available then transfer it to the backup dispatcher.

Other: (Always verify client is listed on screen with contact information)

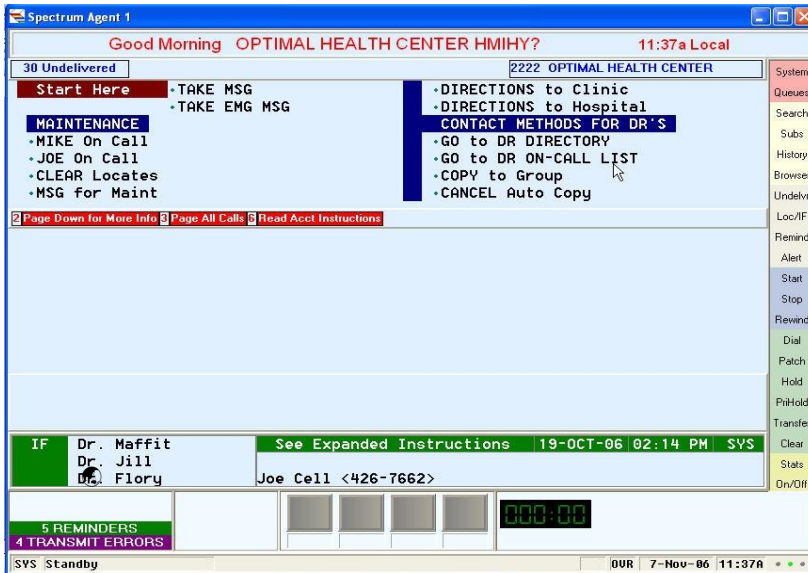

(name) O/C TL (date)
O/C: (name) TL (date)
B/U: (name) TL (date)

****IF YOU HAVE ANY PROBLEMS ASK THE DISPATCHER BEFORE
DISCONNECTING THE CLIENT****

Never give out PHONE NUMBERS unless it clearly states “REFER” OR “MGO” (may give out)

USING HYPERTEXT COMMANDS

Hypertext are indicated with a blue dot With an Information Screen displayed on-screen, to highlight a bulleted Hypertext prompt:

- ◆ Press **[Shift]+[SELECT]** to activate the Hypertext prompt or click once on the screen.
- ◆ Use the arrow keys to move to the desired prompt
- ◆ Press **[SELECT]** again and the command(s) will be executed.

- ❖ **CLICK ONCE** the screen to activate the Hypertext Prompt on screen.
- ❖ **POINT AND CLICK** on the desired command, this will select and execute that Hypertext command.

You will be unable to highlight any Hypertext prompt that cannot be executed from the current console "State."

The Hypertext Prompts will perform one or more operations, such as:

- ❖ Go to or view a particular information screen.
- ❖ Go to or view a particular account or sub-account.
- ❖ Speed-dial a phone or pager number.
- ❖ Select a particular free-form message template.
- ❖ Insert Keystrokes into a message or page ticket.
- ❖ Select a particular scripting message template.

TYPES OF MESSAGES

Message Tickets with NO Labeling

Open a message ticket.

Press [IF/ENTER MSG]

Look for the call instructions on the Information screens

**Use [Page Up] or*

[Page Down] to go to the next page on the information screens

Take down the caller's information on the message ticket.

Be sure to follow the order in the instructions.

Announce Patch Tickets

When managing an Announce Patch call always open a message ticket and get the requested information prior to Announce Patching

Directions for patching can either be in the Special Locate, ON CALL SCHEDULAR, Expanded Locate or sometimes on the information screens.

This example shows the Special locate with the Announce Patch instructions.

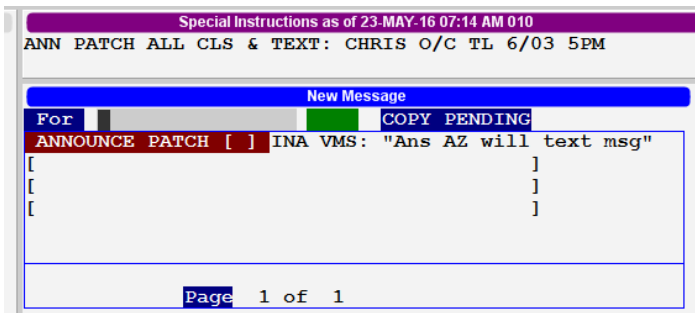

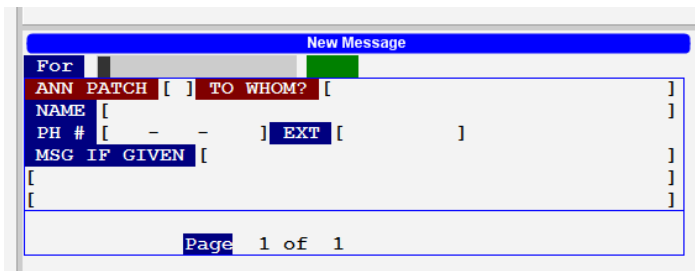

Notice the side note in message ticket:
INA VMS: "Ans AZ will text msg"

This means: If NO ANSWER, operator will leave a voicemail stating, "Answer Arizona will text you the message."

****Patching will be covered in a later section***

Patch Tickets: You don't have to open a MESSAGE TICKET for PATCH calls. Simply PATCH the caller over to the Client.

***HOW TO PATCH WILL BE COVERED IN SECTION VI – MESSAGE DELIVERY**

WRITING EFFECTIVE/ACCURATE MESSAGE TICKETS

OPERATORS MUST WRITE CLEAR AND ACCURATE messages. An OPERATOR is like a news reporter who reports accurate information and follows the concept of “who, what, when and where.”

Messages that are incorrect or unclear can cause serious delay in getting assistance for the caller or a caller’s family member. If the air conditioner stops cooling during a heat wave and the tenant is a senior and the phone number wasn’t confirmed or the address, could cause emergency health issues. **CONFIRMATION OF NUMBERS, ADDRESSES AND NAMES IS MANDATORY**

- ❖ Accurate grammar
- ❖ Correct spelling
- ❖ Easy to read and understand by the dispatcher, the on call or a nurse, etc.
- ❖ Appropriate descriptive words (buttocks, breast, urinating, nasal discharge, rectum, etc.)
- ❖ Include all relevant details (who, what, when and where)
- ❖ Write the message using the 1st PERSON words as if the caller is the one writing the message.

1st PERSON PRONOUNS: I, WE, ME, MINE, MY, OUR. Example: “I need a prescription,” “My prescription wasn’t called in to the pharmacy” or “I have a question about my water heater.”

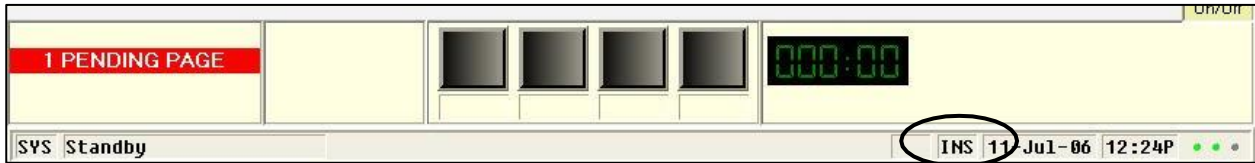

SIDE DOCUMENTATION

From time to time, you may have to add a side note in a message ticket to help better explain an exception or a reason to pass the call. Here are some examples of *side documentation* you may have to use on a message ticket:

- ❖ *C/B MISSED CALL (CALL BACK MISSED CALL)
- ❖ *N/A (NO ANSWER)
- ❖ *BKL NO ANSWR (BACKLINE NO ANSWER)
- ❖ *VM FULL (UNABLE TO LEAVE A VOICE MAIL, VOICE MAIL FULL)
- ❖ ADV NO AFTR HR RX (ADVISE NO AFTER HOUR RX)
- ❖ *CLR INSISTS ER (CALLER INSISTS EMERGENCY)
- ❖ *2ND, 3RD CL (2ND OR 3RD CALL)
- ❖ *CANCEL MESSAGE
- ❖ *PATCHED

INSERTING AND OVERWRITING TEXT

By default, text is entered in the "OVR" (Overwrite) mode in Spectrum. This means that when the cursor is placed at the beginning of an existing word or sentence, the new text that is typed will overwrite the existing text.

An agent can press the [INSERT] key to switch to the Insert "INS" mode. This will make the new text to be inserted and will not overwrite the existing text but will shift it to the right.

To return to the "OVR" mode, simply press the [INSERT] key again. The "OVR" prompt re-appears.

INCOMPLETES

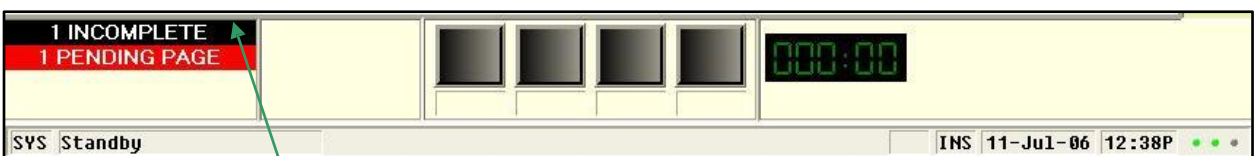

Incomplete messages can occur if an agent, while entering a message, answers an incoming call before [FILING] the current message.

ACTING ON THE "INCOMPLETE" MESSAGE PROMPT

Do not allow more than 3 Incompletes. If you happen to get 3 Incompletes stop answering calls finish out the incompletes and [FILE] them.

When "Incomplete" messages are present a prompt will flash in black in the pending area denoting the total number of incomplete messages residing at that console.

An Incomplete message can also be created by pressing the [SAVE] key while in the "Entering Msg" state before the [FILE] key is pressed. This "forces" your work to your Incomplete stack, so that you can return to "Standby" state for the next task.

WHEN THE "Incomplete" MESSAGEs, from "Standby,"

1. Press the [Esc] key **twice**, complete any work on the **Incomplete** ticket.
2. Press the [FILE] key to complete the message, press [Esc] **twice** to display the next **Incomplete** message.
3. Repeat until all **Incomplete** tickets are [FILE]'d.
4. -Or- use your mouse to double-click on the black flashing INCOMPLETE

TO FLIP THROUGH THE INCOMPLETE MESSAGE STACK:

- Press [Esc] **twice** to display the first **Incomplete** message.
- Press [SAVE] to place current message on bottom of incomplete stack.
- Press [Esc] **twice** to display the next incomplete message.
- Press the [SAVE] key again to place message on bottom of stack.
- Repeat the above steps until the desired **Incomplete** ticket is displayed.

USING THE COPY/SAVE KEY TO EDIT MESSAGES (SECTION BEING UPDATED)

You may only EDIT your own ticket if you made an error after filing the ticket. But, you cannot EDIT your own (original) ticket if you get another call from same person/patient wanting to change the information on the ticket.

OPERATOR must [COPY] message to input the new information on a new ticket. (note: 3400 msg instructing to do a new ticket?)

- Examples of information change could be:
- New phone number
- Different room number
- Person missed the call from the ON CALL
- Hospital calls back to change a ROUTINE CONSULT to URGENT CONSULT F
- or 2nd, 3rd or 4th calls
- Caller wants to cancel the ticket.

ANSWER ARIZONA MUST HAVE DOCUMENTATION OF EVERY CALL\RECORDING

[SAVE] to edit an undelivered message or to force a msg on to the Incomplete Message stack.

[ALT]+[COPY] to make a copy of a message for a designated account AND make any necessary editing corrections, and press [FILE] to initiate.

The [SAVE] key can be used to add/edit information on a Message ticket, re-direct a message to another person (change the “For” field), or to force a ticket on to the Incomplete Message stack. Modified messages are placed on the Saved Messages List (if enabled in the AMR).

From the “*Delivering Msg*” state:

Press [SELECT] key to display the desired message.

Press the [SAVE] key to re-open the message ticket, the cursor will appear in the “*For Field*.”

Make the necessary changes to the message ticket.

Press [FILE] when editing is complete. The message will be marked with an 'S' in the status column, indicating that the message has been modified.

****Reminder on Incomplete Messages***

Do not go over more than three incompletes. Stop answering and go back and finish out the Incomplete message tickets.

Also, All **STAT, Stemi calls** or **any call where the Nurse or Doctor is saying pass it ASAP.**

- Stop answering calls and finish the message ticket then alert the dispatcher right away.

DO NOT LET THESE TYPES OF CALLS TO THE INCOMPLETE STACK.

DOCUMENTATION FOR 2ND AND 3RD CALLS OR CANCELING A MESSAGE:

SECTION BEING UPDATED 8/28

When a caller tells you this is their "2ND OR 3RD CALL or they want to CANCEL a previous message: Create a new message ticket, noting a SIDE DOCUMENTATION *2ND OR *3RD call or CANCEL at the end of the message.

If a second call, ALWAYS confirm the caller's phone number. An OPERATOR could have entered an incorrect phone number and/or didn't verify the number with the caller.

You can COPY the previous ticket by [ALT] and [COPY] keys (COPYING MESSAGES) will appear at bottom of left of screen, type in account number, pull up a new ticket, type in [FOR FIELD] *2nd call or cancel and in the body of the ticket and [FILE]

This is very important. Our client did not receive the first call either because it failed to transmit to their text, email or the client hasn't had an opportunity to call the caller back. This lets the dispatcher know they have to confirm a SECOND CALL

007 Delivering Message

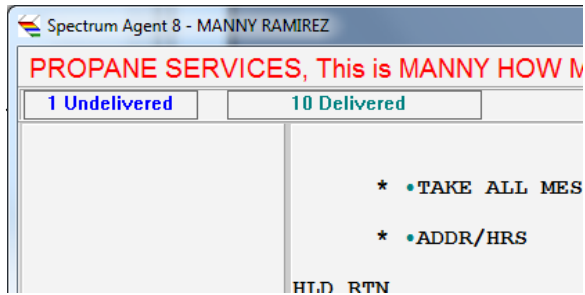

INS 15-Aug-23 3:27P

Windows taskbar: Type here to search, X, N, W, icons for calendar, file explorer, and other applications.

PRESS F12 TO FILE AWAY 1ST CALL

DELIVERING MESSAGES

Display the Client's account.

Look to see if there are any pending messages in the "UNDELIVERED" stack.

If there are undelivered messages, advise the client they have messages.

Depending on how many messages there are the Client may either want you to verbally relay the messages to them or they may request that you fax the messages over to them.

If the client requests for the messages to be faxed, then alert the dispatcher and they will fax the messages.

If the office says they will take down the information, then verbally relay the messages:

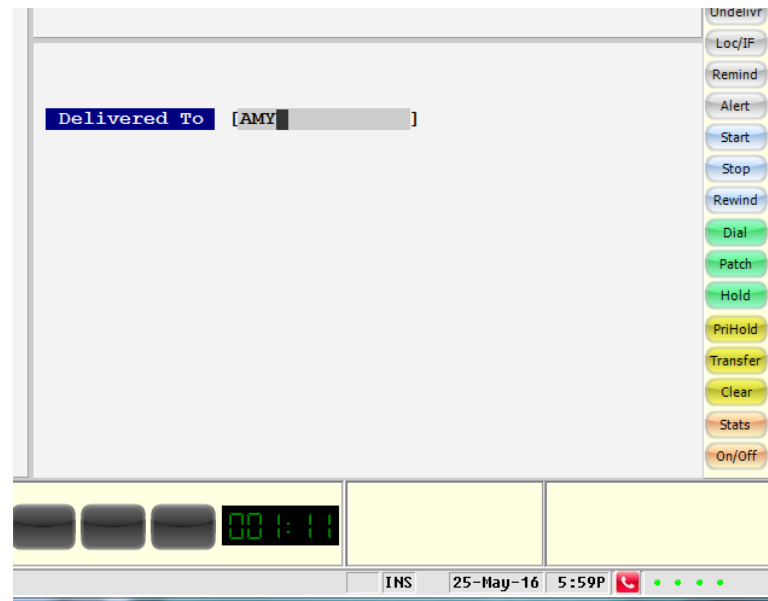

Press **[IF/DELIVER MSG]** - *Entering DTF*
TYPE the Client's name in the Deliver to Field

Press **[SELECT]** - *records the name of client.*

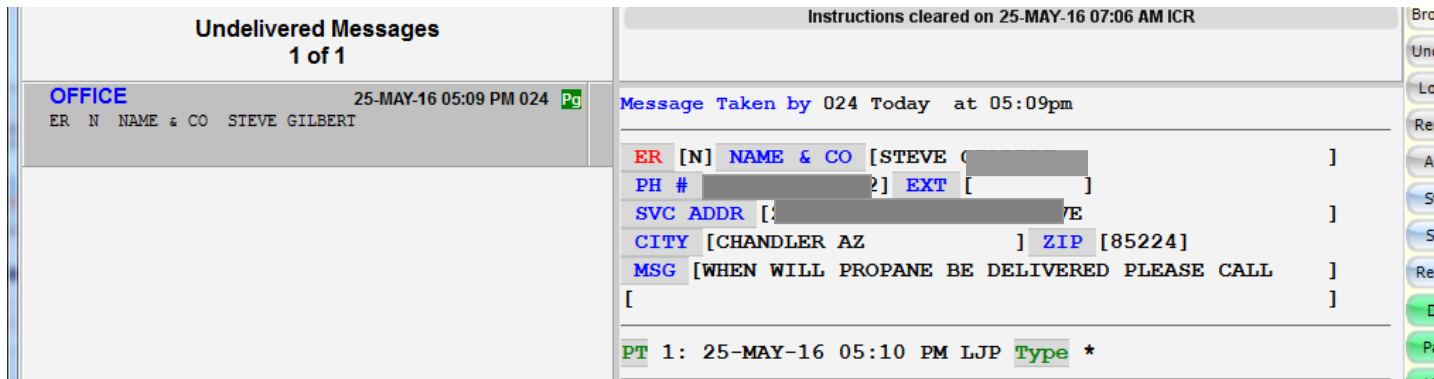

Press **[SELECT]** again to open the first message
verbally give the client the message starting with the date and time of the call.

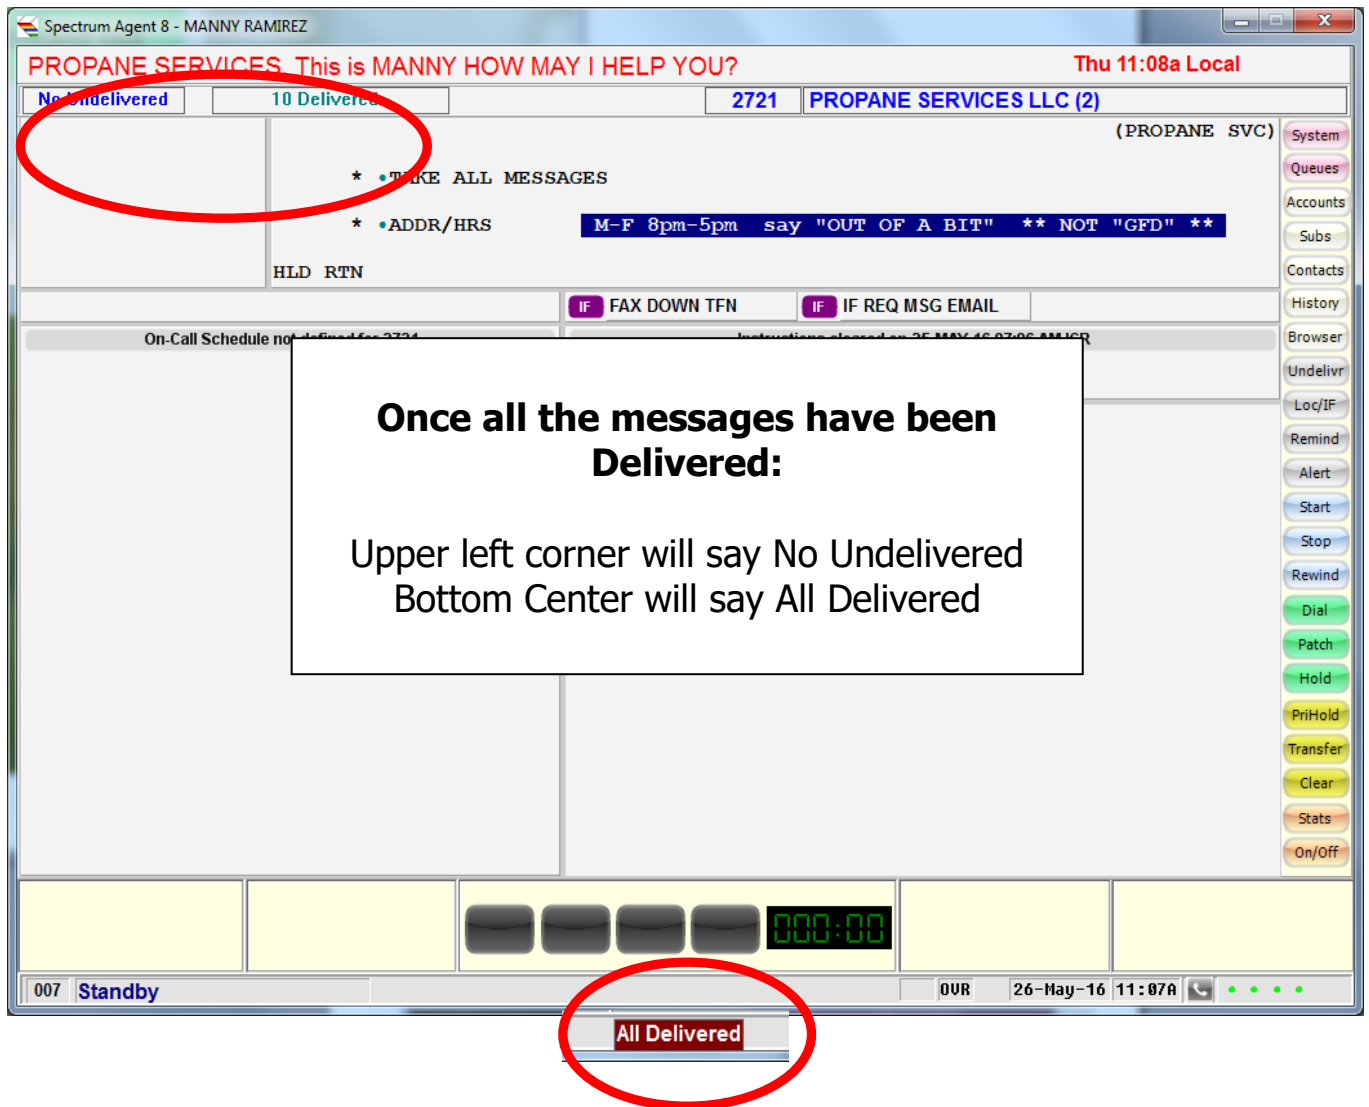

Press **[FILE]** - *Completes the message and sends to the delivered message stack (see above 10 delivered)*
move on to the next message by arrowing down.

Then press **[SELECT]** to select the next message.
keep repeating until all the messages are delivered.

*If for some reason you need to escape out of a message then press **[ESC]** twice, then you will be able to **[ARROW UP/DOWN]** to next message.

OFFICES CHECK OUT:

Many of the offices will call in and let us know that they are forwarding the phones. They may either be forwarding for a meeting, lunchtime or leaving for the day/weekend. They may even be calling in to let us know they are having phone/computer issues at the office. Remember most offices can be identified by the caller ID.

Be sure to always look at the caller ID prior to placing the call on hold.

When checking out or forwarding their phones the client may advise you as such:

"Stepping out for lunch." OTL

"Going into a meeting." C/F IN MTG TL 2PM

"We are forwarding the phones." TFN

"We are rolling the phones."

"You have our phones."

"Leaving for the day/weekend." GFWKND

If they are gone for the day or gone for the weekend GFD

Then update the Special Locate with GFD or GFWKND

Also, when the office checks out, they may:

give a time frame of when they will return.

advise you of who is o/c.

give you instructions on how to manage emergency calls and routine matters.

when the office calls in to give on-call info always get:

the name of the person/technician/DR on call

the start/end date and time of when the person/DR will be on-call.

the name of the Client that gave you the on-call information.

Whenever the office gives you on-call instructions you must let the dispatcher know what they advised. Also, document what their on-call instructions are in the Special Locate. If the Client is giving you in depth or confusing on-call instructions then alert the dispatcher, they will advise you to transfer the client to them. Let the client know you will transfer them to the dispatcher who can better assist them. Do not say HOLD.

“IF” MESSAGES

An “IF” Message allows a client to leave a message for a specific caller when he/she calls the service.

The screenshot displays a medical office phone system interface. A red circle highlights the 'IF' messages section, which includes buttons for 'DR TONYA WHITING', 'NO BNR GTWY/BYWD', and 'DR CLARK WYSONG'. A green bar below these buttons reads 'See Expanded Instructions 12-MAY-16 08:34 AM 019'. A pop-up window titled 'Click on IF Message and a pop up window will display further instructions.' is overlaid on the top left. Another pop-up window titled 'Message Text' is overlaid on the bottom right, showing the content of an IF message: 'IF Message: DR CLARK WYSONG', 'Taken 20-JAN-16 at 4:53PM by 018', 'From: DR DISHNER', and 'IF DR CLS AND SPECIFICALLY WANT'S TO SPEAK WI TH DR DISHNER PATCH TO HIS MOB.'.

Click on IF Message and a pop up window will display further instructions.

When answering a call always take a quick look to see if there are any IF Messages.

You may have to address something with the caller while they are on the line.

Message Text

IF Message: DR CLARK WYSONG
Taken 20-JAN-16 at 4:53PM by 018

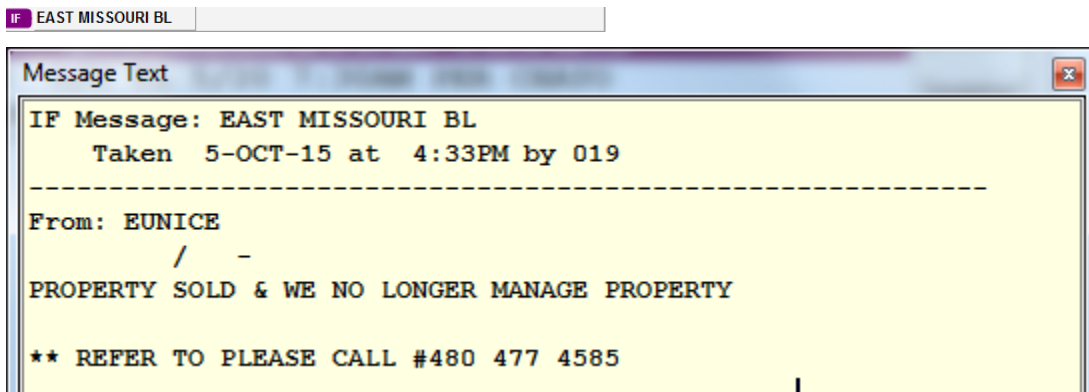

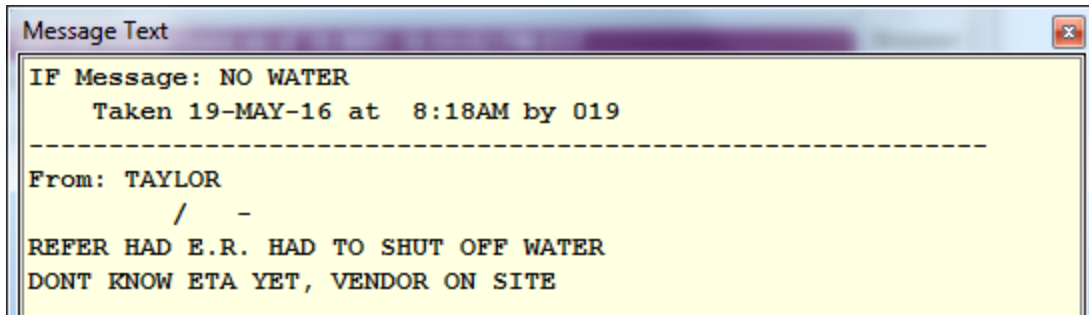

From: DR DISHNER
/ -
IF DR CLS AND SPECIFICALLY WANT'S TO SPEAK WI TH DR DISHNER PATCH TO HIS MOB.

In the example above Dr. Dishner called in to the answering service and requested that when Dr. Clark Wysong calls in and specifically asks for Dr. Dishner, then we are to patch Dr. Clark Wysong to Dr. Dishner's mobile number.

The IF message should always be titled with the name of the person/situation that the message is for

Here are other examples:

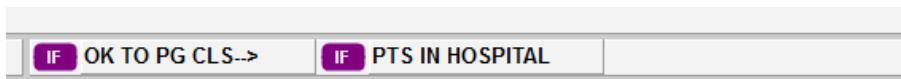

Also, you may see IF messages used in this manner on some accounts:

OR

These IF messages are to be read across. See the -->>> this means the message carries over to the next field. This is used to relay small info quickly to the operator.

To Create An "IF" Message

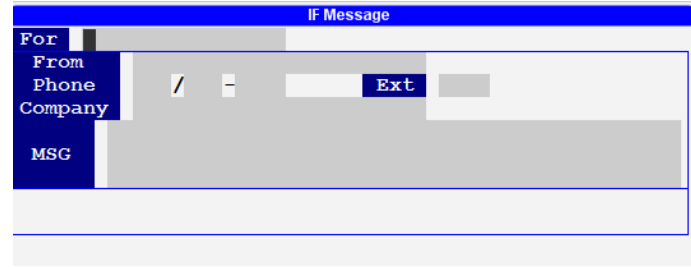

DISPLAY the account.

Press **[Shift]+ [IF ENTER]**

Fill in the fields on the **IF** Message ticket.

*Always put the name of the person or situation the message is for in the FOR Field.

Press **[FILE]**

The screenshot shows a terminal window titled "If Message". On the left is a vertical menu with options: "For", "From", "Phone", "Company", and "MSG". The "For" option is currently selected, and its corresponding input field is active, showing a cursor. To the right of the "For" field are two smaller input fields, one of which contains a forward slash "/" and a hyphen "-", followed by a button labeled "Ext". Below the "For" field is a large, empty rectangular area for the message content.

[To escape from an unwanted IF Message:](#)

press **[Esc]** twice and **"C"** to **cancel** when prompted.

Press "C" to Cancel Message

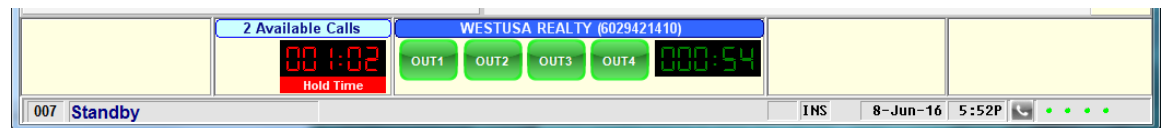

THREE WAYS TO PATCH A CALL: PATCH, ANNOUNCE PATCH AND DUAL PATCH:

Patching is connecting the Caller (inbound line) to the Client (outbound line). A completed MESSAGE TICKET is not required for patching calls.

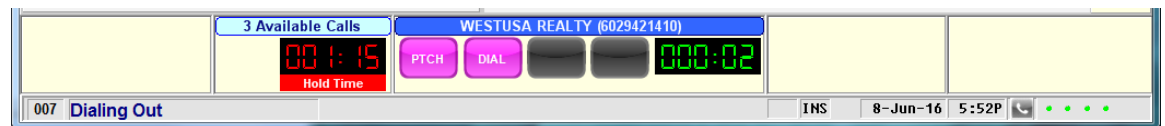

How to PATCH:

Say “One moment please while I connect you to Client’s name .”

Press
[PATCH]

Press
[TALK 1-4]

Click on either hypertext link or you may have to dial the number yourself:

If Hypertext link:

Click on hypertext link -
shows speed dialing.

EVA SKYLES **	REFER 619 251 5089 **
GET CLRS NAME (1st&last), # & ADDRESS CALLING ABOUT then REF MOB THEN PATCH no delined Name or Msg must get info!!

Click on link second time -shows dialing out.

Once you hear the call ringing then,

Press [PATCH] -brings the caller on the line.

Press [STATUS/CLEAR] -disconnects call.

***NOTE FOR MEDICAL ACCOUNTS**

If the instructions are *Patch to Dr. O/C*, then that means **Announce Patch**.

Always **Announce Patch** if it says to Patch to the Dr. O/C and if no answer Leave Word to Call Answering Service (LWTCAS) as a side documentation.

If Dialing the Phone Number:

Press [**PATCH**]

Press [**TALK 1-4**]

Press [**DIAL**]

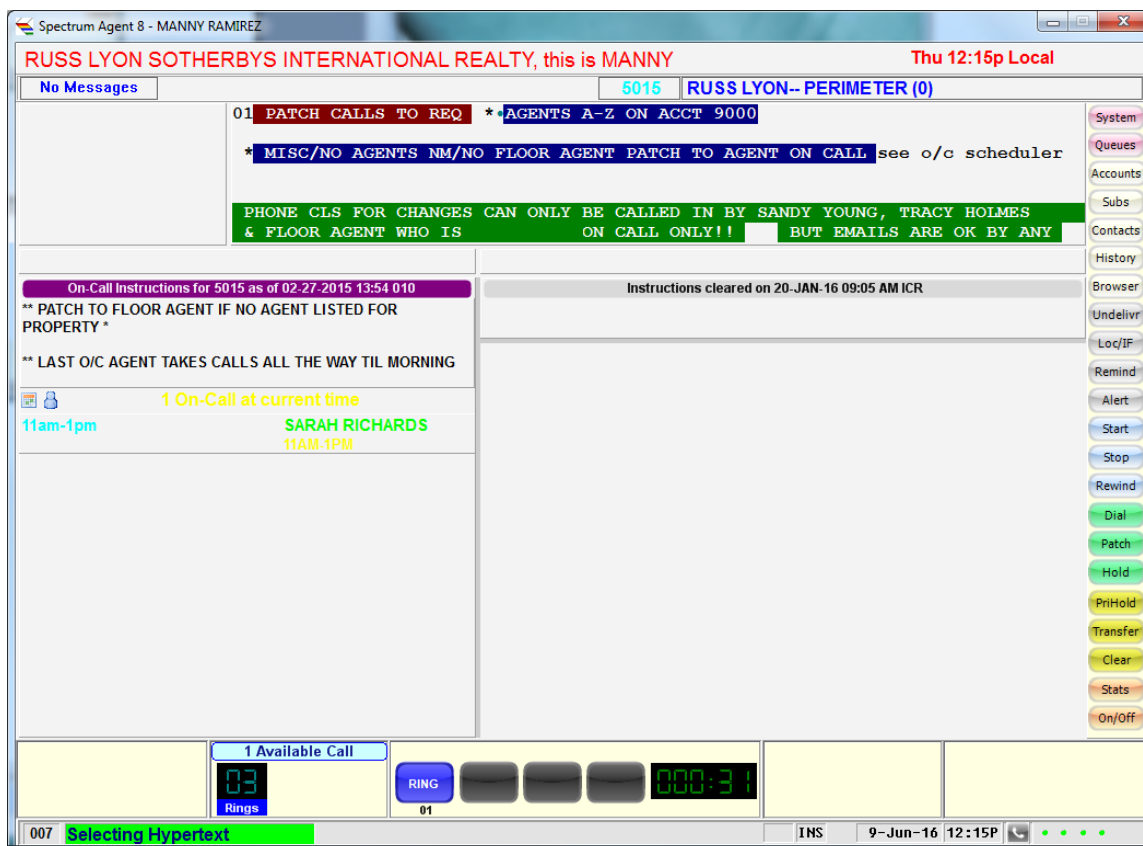

Once you hear ring tone then,
Key-in the phone number

Press [**DIAL**], a second time

Once you hear the call ringing then,
Press [**PATCH**] – *Brings the caller on the line.*

Press [**STATUS/CLEAR**] – *Disconnects the call.*

*Special note Russ Lyons Accts are setup so you can connect to their o/c floor agent by clicking on their name in the o/c scheduler.

ANNOUNCE PATCH: When you take an Announce Patch Call always open a message ticket and get the callers information that is requested from the account. Then you will Announce Patch the caller over to the requested Client's phone number. YOU HAVE to "Announce the Call" to the Client answering, by letting them know who you have on the line. If the Client says "Okay" then release the caller to them. Sometimes the Client may want you to take a message.

How to ANNOUNCE PATCH:

Say "One moment please while I connect you to Client's name."

Press [PATCH]
Press [TALK 1-4]

Click or select either hypertext link/Dial phone# etc. -*Dial Out*

Let the call ring until the Client you are calling answers then say:

" Greeting , this is your name with the answering service,"

"I have caller's name calling for you."

you can let the Client know what the call is regarding.

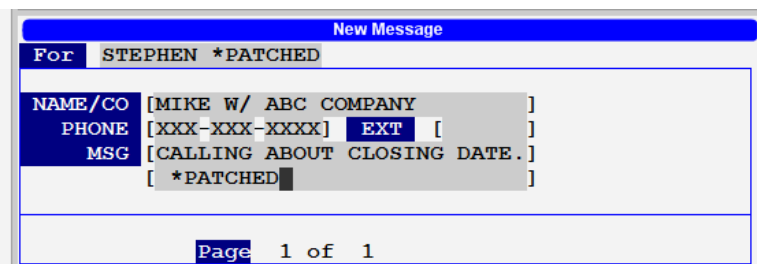

If the Client says go ahead and connect them over,

Press [PATCH] -*brings the caller online.*

Press [STATUS/CLEAR] -*disconnects the call.*

Review message

Document in the message ticket *Patched in the "For" field and in the call notes.

The screenshot shows a web-based form titled "New Message". It has a blue header bar with the title. Below the header, there are four labeled fields: "For", "NAME/CO", "PHONE", and "MSG". The "For" field contains the text "STEPHEN *PATCHED". The "NAME/CO" field contains "[MIKE W/ ABC COMPANY]". The "PHONE" field contains "[XXX-XXX-XXXX] EXT []". The "MSG" field contains "[CALLING ABOUT CLOSING DATE.] [*PATCHED]". At the bottom of the form, there is a "Page" indicator showing "Page 1 of 1".

Sometimes the Client you are calling may not answer and the call and it will go to voice mail. Depending on the accounts instructions you may have to do the following:

Disconnect as soon as you hear the voicemail.

(don't let the caller go to the Client's voice mail)

Pressing **[STATUS/CLEAR]**

-disconnects the outbound call and brings the caller back on the line.

Advise the caller, that the Client they are trying to reach is not available and offer to take a message. Take the message. Thank the caller.

Press [STATUS/CLEAR] -Disconnects the call. Review message before filing.

Document in the message *N/A (no answer) in the "For" field and in call notes

New Message	
For	STEPHEN*NO ANSWER
NAME/CO	[MIKE W/ ABC COMPANY]
PHONE	[XXX-XXX-XXXX] EXT []
MSG	[CALLING ABOUT CLOSING DATE.]
	[*NO ANSWER]
Page 1 of 1	

Press [FILE]

On Some accounts you may see "LWTCAS" or "TVP MSG" for the dispatch instructions.

LWTCAS (Leave Word to Call Answering Service)

If the call you are trying to patch goes to voicemail you the operator leave a message on the Client's voicemail stating as such:

"Please call the answering service you have a message, Thank you."

(On some accounts you may have to leave a call back number, account will state if so and which number to leave.)

Press [STATUS/CLEAR]

-disconnects the outbound call/brings the caller back on

Advise the caller that the person they are trying to reach is not available and offer to take a message. Take the message. Thank the caller.

Press [STATUS/CLEAR] -disconnects the call.

Review message and document in the message ticket *LWTCAS in the "For" field and in the message ticket, at the end of the message.

[FILE] the message. *The Client will call the answering service and retrieve their message.*

***NOTE FOR MEDICAL ACCOUNTS** If the instructions say **Patch to Dr. O/C**, which means **Announce Patch**. Always **Announce Patch** if it says to Patch to the Dr. O/C

TVP MSG (Tone Voice Page Message)

If the call you are trying to patch goes to voicemail, leave a voicemail with all the callers information. (Make sure you open a message ticket and take down the caller's information that

the account requests prior to leaving the voicemail.

Otherwise, you will not have the necessary information to leave on the voice mail for the Client.

After Leaving entire voicemail

Press **[STATUS/CLEAR]** - *disconnects the outbound call/bring the caller back on*

Advise the caller, that the person they are trying to reach is not available and you will let the Client know that they called.

Press **[STATUS/CLEAR]** -*disconnects the call.*

Review message and document in the message ticket *TVP MSG in the "For" field and in the call, at the end of the message.

[FILE] the message.

DUAL PATCHING

Dual Patching is used when the OPERATOR fails to PATCH OR ANNOUNCE PATCH the caller to the ON CALL. The OPERATOR must bring the CALLER back on the line and connect the CALLER to the ON CALL.

1. Press DIAL key
2. Select a line from the TALK lines, enter the caller's phone number (remember to add 1+to area codes outside of 602, 623 and 480)
3. Press DIAL key, call will connect to caller.
4. Example of what to say to caller: *"Hello, this is the answering service, is this (confirm caller's name) I'm going to connect you to the ON CALL, please stay on the line.*
5. Place the caller on PRIORITY HOLD by pressing ALT and CTRL keys.
6. Press DIAL key, select a Talk line, select ON CALL'S contact number ON CALL's page.
7. Announce caller to the ON CALL *"Dr (name) this is the answering service, I have (name of person or patient on the line, may I connect?"* (ON CALL may ask for more information) *Thank you I'll connect.*
8. Press the PATCH key twice and then the STATUS CLEAR key to end the call.
9. Enter *PATCHED in FOR FIELD and *SIDE DOCUMENTATION at bottom of message ticket: *PATCHED
10. If NO ANSWER, enter *No Answer or if you left VOICE MAIL for ON CALL to call back enter in FOR FIELD "LWTCAS" and at end of BODY of the MESSAGE.

MEDICAL ACCOUNT INFORMATION

HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT OF 1996

(HIPPA): This is a federal law created to protect sensitive patient health information from being disclosed without the patient's consent or knowledge. Answer Arizona adheres to this Privacy Rule. Answer Arizona employees are expected to follow this federal law by following the confidentiality of all patient information. Patient names, medical issues, and other personal information are not to be discussed. To do so will require disciplinary action.

EMERGENCIES – ALL ER CALLS ARE TO BE PASSED TO THE ON-CALL DOCTOR OR NURSE.

When you ask a caller if the call is an emergency, and they are unsure or say, “do not know.” Ask them “*do you need me to contact the on-call physician now or can you wait for office to open?*” In most cases the caller is uncertain and expects you to decide. However, we are not trained in the medical field. If the caller does need a call back, then put “yes” on *Emergency* otherwise the call will not be passed. Exceptions:

- If someone in the same office is requesting a specific person to be paged
- If any personal calls such as family members
- A patient told by the doctor to have her/him paged.
- If the on-call doctor requests a message be passed to someone else in his/her office.
- Family members ask to speak to patient's doctor: If patient is *admitted* into the hospital tell caller to ask nurse or med staff member to page patient's doctor. Doctors can't discuss patient's medical information on the phone due to HIPPA laws. Doctor won't know the hospital doctor's orders until he talks directly to the medical staff.
- Take all early morning, next day surgery cancellations and same day surgery cancellations.

REFER ROUTINE MESSAGES TO MEDICAL OFFICE:

- Lab results, appointments, prescription refills.
- The doctor left a message on the caller's answering machine to call the office.
- Referrals
- Forgot appointment time or need office directions.
- Billing questions.

SAME DAY APPOINTMENT CANCELLATIONS OR EARLY MORNING SURGERY ``.CANCELLATIONS

- Take same day cancellations from patients up to 2 hours from when office opens (if opens at 8am, can take cancellations up to 10am).

- Message Ticket information needed for medical cancellations: (1) Name (2) Phone number (3) Date of birth (4) Patient's doctor (5) Re: Canceling (time of appointment at 7:30am/date) and (6) **reason for canceling**.
- Always take early morning surgery cancellations as a courtesy to let surgeons know so they won't show up at surgery site.
- Take same day cancellations from patients up to 2 hours from when office opens (if opens at 8am, can take cancellations up to 10am)
- Pay attention to medical accounts that have different cancellation directions.
- Otherwise, refer callers ROUTINE OFFICE (Call back during normal business hours.

(SHOW CXL TICKET EXAMPLE)

PRESCRIPTIONS: Become familiar with medical accounts that have special instructions on after hour prescription (RX). There may be circumstances where an account says, "no RX" and the call is regarding medication for heart, seizures, blood pressure or diabetes. Then, take a message for the symptom of the drug, not the prescription request.

- Some doctors' offices do not accept after-hour prescription requests AT ALL.
- Or may even say on the account "do not page on call with symptoms."
- Offices may only accept emergency prescriptions but no routine refills after hours.
- Only take prescription calls from the pharmacy if the pharmacy calls the answering service and request the doctor ON CALL be paged and it's an urgent prescription.
- Offices may accept after-hour prescription requests if the office failed to call in the prescription, if they told the patient they would, or the prescriptions are for seizures, blood pressure, heart medication or diabetes.
- Prescription request if patient had recent surgery.
- Or if the patient is having a medication reaction and needs a replacement.

We are not trained in the medical field, but we do know what is urgent and can be life threatening if not taken regularly. Use your discretion and common sense.

MEDICAL NAMES, LAB VALUES, TEST RESULTS: Do not take medication names (you may ask the caller what the medication is used for instead), do not take lab values or test results unless the account specifically states otherwise. Advise the caller that the doctor or medical staff in the doctor's office will return the call. Note in the message *RE: LAB VALUES, TEST RESULTS, MEDICATION.*

BACKLINE: Accounts may have a **BACKLINE*. Never tell callers the account has a *backline number*.

MEDICAL OFFICES CLOSED: When medical offices are closed and the account indicates to refer routine calls to the office, tell the caller "For anything of a routine nature, the office prefers you to call back during office hours and they want us to only pass the emergency calls." If the caller insists on leaving a message, note this in the message. Try to get them to call back. You do not need to argue with the caller.

MEDICAL ACCOUNTS -UNBLOCK TELEPHONE LINES

All medical accounts require us to ask callers to unblock their telephone line for them to receive a call back from a nurse or doctor O/C. To do so, please instruct them to enter *87 or *86 to unblock.

HOSPITAL PAGE (PAGE THE ON CALL DOCTOR, NP, or PA): Ask for the following information on all hospital calls: Is the patient NEW or ESTABLISHED WITH THE DR? NEW means patient hasn't had an office appointment. ESTABLISHED with the doctor means patient was seen in the office and a medical record established. New patients cannot use the AFTER-HOUR service, they must have been seen in the doctor's office first. (Unless medical account information box says "New Patients OK")

HOSPITAL (PAGE) CALL: Obtain the following information from the caller on all PAGE calls: Always confirm with caller the call is for a PAGE not a CONSULT.

- Is this an ANNOUNCE PATCH account?
- Caller's name (nurse or assistant or sometimes the doctor)
- Hospital name (see hospital abbreviations) May also be a TRANSFER CENTER calling.
- Phone number, with extensions if available. ALWAYS CONFIRM the phone number with the caller. NEVER rely on the CALLER ID.
- Patient's name – ALWAYS CONFIRM the spelling.
- Date of Birth, Room/Bed number, MRN# (Medical Records Number)
- Patient's Dr's name. ALWAYS CONFIRM THE DR'S NAME ON THE ACCT, IF IT ISN'T, CHECK ACCT 0003 TO LOCATE THE DOCTORS FIRST AND LAST NAME AND ACCT OR ASK THE PATIENT/CALLER TO VERIFY THE OFFICE ADDRESS.
- NOTE: YOU CAN'T GET INTO THE DR'S DIRECTORY (0003) IF YOU HAVE AN ACTIVE TICKET ON THE SCREEN.
- Lastly, ask the nature of the call. Use appropriate medical terms, i.e., buttocks, stool, urine etc.
- **Again, always verify name spelling, date of birth, hospital, room number, phone number. ALWAYS.**
- Entering incorrect patient data information can delay urgent medical attention for the patient!

HOSPITAL CONSULTS: One healthcare provider requests another healthcare provider from another hospital or medical office to review the patient's medical history, examine the patient, and make recommendations as to care and treatment. Urgent Consults are paged to the ON CALL immediately. Routine consults (depending on time of day) will be paged out the next morning. Obtain the following information from the caller on all consults:

- Is this an ANNOUNCE PATCH account?
- Patient's age and date of birth.
- Room/bed number
- Is this patient new or established?
- Which doctor is the consult for?
- Name of doctor who is requesting the consultation.
- Is consult ROUTINE or URGENT? Enter the FOR field: *RTN CONSULT OR *URG CONSULT OR *STAT CONSULT.
- DIAGNOSIS (DX) OR REASON FOR THE CONSULT?
- Insurance
- Medical Records Number or MRN or MR#

PEDIATRIC ACCOUNTS:

7842 – Phoenix Children's Pediatrics Tempe	2735 Scottsdale Pediatrics: No O/C, refer
7844 – Phoenix Children's Pediatrics Chandler	8804 – Estrella Pediatrics
7845 – Phoenix Children's Pediatrics Gilbert	3908 – St Joseph Pediatrics
7846 – Phoenix Children's Pediatrics SAN TAN	3411 – Phoenix Children's Pediatrics Directory
3433 – Desert Valley Pediatrics	3455 – West Valley Pediatrics

Valley Pediatrics Triage (VPT) – Website: <https://pedstriage.phoenixchildrens.com> (website, user name/password can be found on Account 3000)

Take messages from callers calling to speak to the TRIAGE NURSE on the website VPT and put messages on the Spectrum Ticket during AFTER HOURS ONLY.

Triage Nurse Account is ALWAYS sub-account .02 **CAUTION! Do not put TRIAGE message ticket on HOME PAGE.**

Read SPECIAL INSTRUCTIONS/LOCATE on times on the account when the TRIAGE NURSE is available. If the caller doesn't receive a CALL BACK in an hour, must do second call by re-entering information on the VPT website and NEW Spectrum Ticket with new encounter number.

If TRIAGE NURSE is calling to check in, transfer immediately to DISPATCHER.

Triage nurse on call may call in stating she/he attempted a number of times to reach the caller with no answer, or no voice mail set up. You are to enter this information in the IF message (See Section IV page __) for instructions on completing an IF message or ask for help.

NEWBORN NOTIFICATIONS: Hospitals will call the pediatric offices to report newborns. Most pediatric accounts have a page for Newborn Reporting. You must familiarize yourself with these calls. Take a “peek” at the NEWBORN page for pediatrics, familiarize yourself on how to get to this page on the accounts.

If Nurse says “Well baby, notify only (no call back) enter *NEWBORN* in FOR field.

[SHOW WELL BABY MESSAGE TICKET]

If nurse says “Well baby, needs call back” enter in the FOR-field O/C.

[SHOW NEED CALL BACK MESSAGE TICKET]

- **Name of caller/hospital, phone number (verify number)**
- **Baby Girl (BG) or Baby Boy (BB)** ~~Use~~ *abbreviations if need space for remaining information.*
- **Ask: Time born, weight, Apgar level (example: 9/9, 8/9, 7/9 6/9 etc.), who delivered, vaginal or c-section, well baby or sick baby, no call back needed (well but need call back) which doctor is assigned, room number (RM/#) or if no room number enter: RM/None**

USING TABLES (*UNDER CONSTRUCTION PENDING INSTRUCTIONS*)

Tables provide different types of information to assist the operator in routing callers (customers of our clients) to the correct technician, doctor, realtor, property manager, etc. in a timely manner.
Tables will pop up when you click on the Hyperlink. [show a hyperlink]

Below are examples of accounts that utilize tables to assist us.

ACCOUNT TABLE: Use this table to locate correct account names and their account numbers. Must check “search” both the “Account Number or Name” and the Answer Phrase as there may be similar account names. Example: Arizona Digestive Health vs Arizona Digestive Phoenix Endoscopy. You can only search one at a time.

DOCTOR’S DIRECTORY ACCOUNT 0003

When taking messages from hospital or other medical facilities or from patients, we must verify the doctor is listed on the account.

Ask the patient or hospital caller which doctor the patient sees.

Search the account for the doctor’s list (Accounts have a page for the doctor’s listing or doctor’s list may be on the HOME PAGE.)

If unable to locate the doctor’s name, you can search the DOCTOR’S DIRECTORY in Account 0003. (You cannot search this account if you have an active ticket on the screen. You must cancel the ticket first.)

Doctor’s Directory is shown as a Table:

1. Remove the black check mark in the small box.
2. Enter the doctor’s last name, press search.
3. A list of doctors with similar names will pop up with the account numbers they’re affiliated with.
4. Select the correct first and last name of the doctor and the account number (confirm first this account is the same account the caller came in on) by DOUBLE CLICKING on the Table’s line. This will automatically connect you to the correct account.
5. Pull out a new message ticket and complete the ticket.

If the Doctor’s name is not listed, ask the caller to verify the Account’s address. If it matches, you can complete the message ticket. Add a SIDE DOCUMENTATION at bottom of message as follows: “*VERIFIED ADDRESS

(See example of DOCTOR’S DIRECTORY TABLE – Account 0003 on next page)

MEDICAL TERMINOLOGY

DR - Medical Doctor

PA – Physician’s Assistant

NP – Nurse Practitioner

MW – Midwife

MA – Medical Assistant

EMT – Emergency Medical Technician

PARAMEDICS – A person trained to give emergency medical care to people who are injured or ill.

STAT – Short term around Time or immediate response is needed.

CRITICAL – Relating to a medical crisis or the value of a lab measurement.

CODE BLUE – Hospital Emergency code used to describe the critical state of a patient. If a patient goes into cardiac arrest, respiratory or another emergency. The Rapid Response Team is always ready.

STEMI – *ST Elevation Myocardial Infarction*. Commonly known as a heart attack or when blood stops flowing properly to parts of the heart which injures the heart muscle due to lack of oxygen.

MRN – Medical Records Number assigned to patients.

APGAR – Guideline used to check a newborn’s health. A-muscle tone, P-pulse, G-grimace/reflex irritability, A-appearance, R-respiration. On a scale of 9 to 1 (9 being the **highest**.)

-DRAFT - HOSPITAL ABBREVIATIONS (ACCT 0004) 2023

[illegible]

IN HOUSE MEMO'S

In-house memos are used to communicate between Answer Arizona staff for several reasons. Staff must sign on to Spectrum to generate a memo. Memos are sent from station to station.

Reasons for sending memos:

- The dispatcher is asking for clarification on a ticket you filed.
- Dispatcher may request you to correct an incorrect ticket.
- The operator may be asking you for help.
- Gene or Ilene may have questions about payroll, leave request, etc.

Entering/Delivering

- To send a memo to another employee who is signed on to Spectrum.
- Spectrum screen must be cleared.
- Select IF ENTER MSG
- Enter recipient's name and station number (single digits add a "0" in front of the single digit).
- At the bottom box enter your message.
- If you use up the space in the message box and have additional information, file the first memo, and select a new memo to complete your message and file again.

Acting on a Memo to Another Operator

- Memos must be opened as soon as possible.
- Operator must alert the deliverer Memo was received or by alerting the sender you made corrects if dispatcher requested you correct a ticket.

Transferring a Memo to Another Operator/Dispatcher

- You may receive a memo in error. If it is intended for the dispatcher but an operator sent it to your station in error, you can transfer that memo to the dispatcher OR dispatcher may send a memo to all operators signed on by asking each operator who receives the MEMO to transfer it on to the next operator.
- To TRANSFER a memo to another operator: Select TRANSFER on the Short Cut button and select the operator's station number. Message is then transferred to the next operator.

MISCELLANEOUS INSTRUCTIONS – Updated Draft

The following information pertains to basic situations only. There will be times when a judgment calls on your part will be necessary. Make yourself familiar with the guidelines. Some common situations are included below:

- ❖ Do not refer to any information that is not listed on the account to be given; even if the caller is asking questions that you personally know the answers to. Only allowed to give out office phone numbers, fax numbers, and addresses. Ask if unsure!
- ❖ WE ARE A MESSAGE CENTER – DO NOT SAY YOU ARE THE ANSWERING SERVICE TOO MUCH. Callers are less likely to sound rude and annoyed if you follow this.
- ❖ Do not automatically say: “you are the message center” or quote the office hours. You may acknowledge if asked or if the caller continuously asks questions only office personnel could answer. Our clients pay us to take messages, NOT to tell the caller to call back when the office opens. Our services would not be needed if that were the case. Our clients would buy an answering machine for that type of service and save themselves money. Always offer to take a message unless it states on account to refer routine to office.
- ❖ One of Answer Arizona’s standards is that no caller will ever be put on “automatic hold.”
 - This is when a caller does not get a chance to say anything before being put on hold.
 - DO NOT SAY: “Good evening, Realty Executives, one moment please.”
 - DO SAY: “Good evening, Honor Health Phoenix, can you hold, please?” See above for more instructions on page.
- ❖ Ringing lines are your first priority. Answer them first, then go back to those holding. But never put a call on hold more than one time, unless traffic increases dramatically, then use priority hold. No one likes having to pick up an angry caller who has already given you information so if they give you the story keep them on priority hold.
- ❖ Once you enter anything into the body of a message (more than just who the caller asked for), that message is your responsibility. If you must put the caller on hold, use priority hold. Do not put them on regular hold for another operator to pick up. No one wants to try to finish taking a message someone else started.
- ❖ Due to the limited space available for a message, using abbreviations is necessary. A list of authorized in-house abbreviations has been included in this manual. Do not use any abbreviations for messages unless they are universally known or approved by Answer Arizona.
- ❖ The dispatcher must be immediately by announcing aloud and making sure they acknowledge you, if call is either STAT, regarding a patient chest pains, Tempe School District Crisis Line-acct 2765-or regarding anyone stuck in an elevator.
- ❖ The only calls that are to be transferred to a supervisor or dispatcher are calls that you cannot manage. Do not transfer or put calls on hold simply because the caller is difficult to understand or upset.

Everyone gets their fair share of these types of calls. Not one person at Answer Arizona has the right to “pick and choose” which calls he/she will take.

- ❖ If you have established that a call does need to be transferred to another operator, make sure the call is NOT put back on regular hold. Also notify the operator because the call was transferred to him/her by inputting a message in the message ticket.
- ❖ A “basic” message includes:
 - Name (first and last) with the spelling confirmed. If, when asked for a last name, the caller states he/she is a friend or relative, note that in the message. This will let our client know we are doing our job by asking.
 - Telephone number (with area code). Verify EVERY number EVERY time!
 - Nature of the call (NOT just “please call”). If the caller refuses to say what the call is regarding or says our client will know, note that in the message. Our clients don’t pay us to just take a name and number, they like to know why a person is calling and could be more prepared if we take a complete message for when they call back.
- ❖ Many accounts request that the caller be asked if his/her call is an emergency. You must follow the account’s emergency criteria (if any). If a call indeed needs to be passed, even if it is not technically an emergency, you must mark it as an emergency, or it will be held for the office.
- ❖ Each account is different. Every time you answer the phone, look over the account, first hit the Trunk key then hit the Answer when ready, even if you are already familiar with that specific customer. Changes to the account may have taken place since the last time you answered on that account. Be sure to check out accounts 3400 (operator memos) and 4444 (Answer Arizona’s office account) for any new operator memos every day before you start to answer the phone for your shift.
- ❖ Some accounts require specific information that is not included in a basic message. Any information out of the ordinary that our client requests us to get will be highlighted in blue. Any information out of the ordinary that our client requests that we refer to the callers is highlighted in green. Any important or urgent information will be highlighted in red.
- ❖ Most telephone numbers on accounts are unlisted and may not be referred to callers, such as backline numbers. Central office and fax numbers can always be referred to if they are listed. Any numbers the client has given us permission to refer to will be labeled as such. No other numbers may be referred at any time to callers. Backline numbers are used for emergency situations for the answering service to contact the office when they have their phones call forwarded.
- ❖ If a caller is requesting a phone number for someone that is listed on the account, pass call the dispatch. They may refer to that number if the person requesting it is also listed on the account and can verify his/her own residence or pager number or mobile. You must transfer the call to the dispatcher on duty, who can access the numbers needed.
- ❖ For any permanent changes to any account, refer to a caller to our business office M-F 8am-5pm. For example: new office staff, new home numbers, etc. You can take a temporary change and input it locate, but also notify management by inputting a message in account 4444 also.
- ❖ There will be times when you will get an obscene caller. Simply try to take a message if they continue to be unruly or using obscene language notify the caller you can either take a message or if you need to put them on hold to calm down for a second or two. If the caller continues to use obscene language you may notify them, you disconnect the call.

Glossary of Terms used in an Answering Service

Announce Patch: An announcement is made to client of who is on the line. In some cases, we need to announce callers name & information.

Answer Phrase: The actual words the customer instructs the operator to use when a client's line rings in. "Thank you for calling Dr. Jones office, may I help you," is an example.

Apgar: A system for evaluating an infant's physical condition at birth. (Heart rate, respiration, muscle tone, response to stimuli, and color are rated 1 minute then again at 5 minutes after birth)

Auto Answer: A recorded message that can automatically put the caller on hold if all operators are busy.

Automatic Call Distribution: A computer answering system function which routes calls to available operators.

Blocked line: A telephone feature available from most phone companies. The telephone line does not accept outside phone lines if they are BLOCKED. (TO UNBLOCK: *77) (TO BLOCK *87) (requires a 10 digit # in order to get the call to go through usually by pressing "000-000-0000")

Caller ID: Caller identification technology allows the recipient of a telephone call, when the phone rings, to learn the phone number or name of the caller before picking up the receiver.

Call Transfer: Allows you to transfer a call from your phone to someone else's phone.

Check In: The client calls in to the messaging bureau to check for messages.

Check Out: The client calls to notify the messaging bureau that he will not be taking his own calls and that the message center is "on."

Conference Call: A call consisting of a connection among three or more callers participating in a simultaneous discussion.

Connect Time: The length of time a caller accesses the system. From the time the system comes off-hook to answer a ring signal, until the call ends and the line is back on-hook.

Delivered Messages: Messages that have been passed/delivered to a client. [REDELVR]

Direct Inward Dialing (DID): The ability for a caller outside a company to call an internal extension without having to pass through an operator or attendant. It is a special type of seven-digit number which can only receive calls. They can be purchased by messaging bureaus in blocks at very low cost. By assigning a unique DID number to each customer, and having the customer call forward to the number, the bureau can identify which client's call he is receiving.

Down file: List of messages that have been delivered to a client. [UNDELV MSG]

ELI (Expanded Locate Instructions):

FAX (Facsimile): FAX machines are telephone equipment which lets you send a copy of written or drawn material over the telephone to a receiving FAX.

Hard Copy: A printout, on paper, of information contained in the computer.

Headset: A telephone set worn on the head.

Hypertext Command: A target command that will allow you to either display another account, display a message ticket, or dial out.

Internet: An unregulated, global confederation of computer networks linked through regional, private business and educational networks.

Mailbox: Message storage space provided to a user for storing messages.

Mailbox Number: Seven-digit number, or four-digit extension number assigned to a subscriber's message storage space.

Message Center: A service bureau consisting of live operators and/or an automated system recording and delivering messages.

MLS Number: Real Estate agents list a number that is designated to a property address they have for sale.

Modem: Short for modulator-demodulator. Modems connect two separate computers via telephone by converting digital signals into analog signals enabling computers to send data over the telephone networks.

Order Entry: The action of recording an order from a caller for a new product or service.

O/C Scheduler: Spectrum On-Call Scheduler tracks our client's complex schedules so that messages can be relayed accurately, day and night.

Pager: A small device, sometimes called a beeper, which signals the person carrying it that the TAS has an important message.

Patch: The connection of two parties at the messaging service switchboard.

Private Branch Exchange (PBX): Customer premise equipment usually owned and operated by a single company with telephone lines to place or receive calls to the public network and communicate with other extensions within the system.

Prompts: Audio message advising the user that the system is waiting for a command.

Retained message: messages we keep in possession on the operator consoles 1-10 for 30 days.

Ring Count: On manual and computerized concentrator systems, the ring count is the client's instructions as to how quickly the call should be answered. A standard ring count is three.

SMS:

Spectrum Secure Messaging:

Stexting:

Speed dial #: a number with a purple dot used for easy access to dial out /alpha page/email/display an account. a speed dialed number is a number preprogrammed in the computer allowing rapid dial while reducing errors in dialing.

TAS: Telephone answering service.

Tiger Text:

Traffic: The flow of calls (attempted and completed) across a telecommunications network.

Transcription: Conversion of voice data into written text.

Trunk: A telephone circuit or channel connecting two switching systems. (Between a telephone company central office and a TAS computerized answering service.)

Undelivered: A list of messages that have NOT been passed. [DELIVER MSG]

Upfile: A list where messages that have not been passed and are waiting to be delivered. [DELIVER MSG]

Voice Mail: A specific voice messaging service in which users record and distribute messages among other subscribers, each of whom has a unique voice mailbox or address.

HOW TO USE ACCOUNTS: 0000, 3000, 3400, 4000, 4444.07

Account #0000: Is the Employee account where shift times, break times, and in-house messages can be accessed.

Account #0003: Is the Doctor's Directory. This includes all Answer Arizona Medical Accounts. This directory is set up following the TABLES format. You must remove the black checkmark before searching a doctor's name.

[INSERT example of the doctor's table]

Account 3000: Is the Nurses/Triage account where you can find the Pediatric Accounts and the Triage Sub-Accounts that includes the Valley Pediatrics Triage (VPT), Username and Password. [NEEDS MORE INFORMATION]

Account 3400: Is where messages are posted regarding account changes, client complaints, etc. This account must be checked at or during dispatcher's/operator's shift. Each of us must read the account changes or account complaints and INTIAL and DATE that we have read the information.

Account 4444.07: Is where you can "FIX" your timecard or request TIME OFF. Read the Requesting Time Off GUIDELINES before requesting time off.

SPECTRUM SYSTEM TROUBLE SHOOT

(Requested TD to contribute to this Section and Will Add the instructions from 5083 regarding if having system issues)

TIGER CONNECT WEBSITE

PMD WEBSITE

ADP TIME SHEET – Signing in and Out

VPN – VIRTUAL PRIVATE NETWORK: Allows employees to access their company's private network when working from home. It is very important to LOG OFF the VPN when done with your shift. Otherwise, other operators attempting to sign on at their shift times after you will not be able to do so. If you don't sign off the VPN, it may take the IT person an hour to access your equipment to log off for you.

REMEMBER TO SIGN OFF THE VPN AT THE END OF YOUR SHIFT

If the system is "off-line" or in "retry," and the screens are not functioning, you should still be able to take messages.

The messages must be handwritten on paper and entered into the accounts once the system is back online.

Answer the phone by saying "Good morning/evening, this is ____, may I help you?" (Only answer this way if the information screens are not being displayed).

Write down the account number, which will appear in the "talk" window.

If you take an emergency call, alert the dispatcher immediately. If callers/clients, ask questions just refer to them we are currently updating our system sorry for the inconvenience.

MILITARY ALPHABET: History of and Reason for Using

The Military Alphabet is a special phonetic alphabet used by the military to communicate over radios and other devices. The military alphabet was created to improve communication among military members.

It is a set of twenty-six words that are used to spell out letters when communicating over the radio or telephone.

This system helps to ensure clarity and accuracy in communication, especially in noisy or difficult environments. The military alphabet consists of the standard English alphabet, plus extra words that are specific to military use which include words "alpha," "bravo," and "Charlie."

This alphabet is used anywhere that clear audio communication is of the highest importance, such as Answer Arizona who takes medical emergency messages where accuracy of names and medical terms is crucial.

Use the Military alphabet to accurately confirm the spelling of names and medical terms:

Example: Confirm spelling of ARIZONA using the following alphabet by spelling out the letters using the military alphabet to confirm the letter:

A – ALPHA
R – ROMEO
I – INDIA
Z – ZULU
O- OSCAR
N- NOVEMBER
A - ALPHA

A	ALPHA		N	NOVEMBER
B	BRAVO		O	OSCAR
C	CHARLIE		P	PAPA
D	DELTA		Q	QUEBEC
E	ECHO		R	ROMEO
F	FOXTROT		S	SIERRA
G	GOLF		T	TANGO
H	HOTEL		U	UNIFORM
I	INDIA		V	VICTOR
J	JULIET		W	WHISKEY
K	KILO		X	XRAY
L	LIMA		Y	YANKEE
M	MIKE		Z	ZULU
